NUCLEAR INSTRUMENTS AND METHODS

A journal on accelerators, instrumentation and techniques in nuclear physics

EDITOR: K. SIEGBAHN, UPPSALA
ASSOCIATE EDITOR: C. NORDLING, UPPSALA

EDITORIAL BOARD:

J. B. ADAMS (CERN)
F. A. ALSINA (Bariloche)
H. L. ANDERSON (Chicago)
M. Q. BARTON (Upton)
P. R. BELL (Oak Ridge)
N. N. BOGOLUBOV (Moscow)
S. BRANDT (Siegen)
H. BRINKMAN (Groningen)
D. A. BROMLEY (New Haven)
P. CHRISTENSEN (Roskilde)
E. H. COOKE-YARBOROUGH (Harwell)
M. DEUTSCH (Cambridge, Mass.)
B. S. DŽELEPOW (Leningrad)
G. T.EWAN (Kingston)
W. GENTNER (Heidelberg)
F. S. GOULDING (Berkeley)
O. HAXEL (Karlsruhe)
R. L. HEATH (Idaho Falls)
R. KLAPISCH (Orsay)
M. S. KOSODAEV (Moscow)
F. KRIENEN (CERN)
H. LANGEVIN-JOLIOT (Orsay)
G. E. LEE-WHITING (Chalk River)
B. LEHNERT (Stockholm)
H. MAIER-LEIBNITZ (Bonn)
E. M. McMILLAN (Berkeley)
M. G. MESCHERYAKOV (Moscow)
W. PAUL (Bonn)
A. S. RAO (Hyderabad)
J. R. RICHARDSON (Vancouver)
M. SAKAI (Tokyo)
G. SALVINI (Rome)
CH. SCHMELZER (Heidelberg)
A. M. SESSLER (Berkeley)
N. G. SJÖSTRAND (Göteborg)
R. TANGEN (Oslo)
S.C.C. TING (Lexington, Mass.)
E. W. TITTERTON (Canberra)
R. VAN LIESHOUT (Amsterdam)
J. WALKER (Birmingham)
O. WERNHOLM (Stockholm)
R. R. WILSON (Cornell)

INFORMATION TO AUTHORS

Contributions, written in English, French or German, and books for review may be sent either directly to the Editor, Professor K. Siegbahn, Institute of Physics, University of Uppsala, Sweden, or to one of the members of the Editorial Board. *Contributions and figures to be sent in duplicate.*
Short contributions of *less than 1500 words* and not subdivided into sections, may be published as Letters to the Editor, in a shorter time than regular articles as the proofs will normally be corrected by the publisher.
Review articles, written in English, may be sent directly to the Editor.

Before mailing the manuscript, please check the following points:
1. Is there an *abstract* in English? (Letters to the Editor should have an abstract of *less than 30 words.*)
2. Have you given the name(s) of the author(s) on the manuscript and the name and address of the institute where the research work was done? (Proofs will be sent by the publisher to this address.) For the sake of correct indexing in abstracts journals etc. it is recommended that authors use full forenames rather than just initials.
3. Is the manuscript clearly typewritten, with ample space between the lines, is the subdivision logical, and are the text and figures *ready for printing*? (The costs for making corrections are very high when proofs have been made of a manuscript. It will therefore be assumed that the submitted manuscript is in final form. Authors will be charged for corrections against manuscript if the expense exceeds a certain amount.)
4. Have you enclosed inked original drawings, or (*preferably not*) glossy prints of every figure, ready for direct reproduction? Are all details, especially the lettering and numbering, sufficiently large to show up clearly in the reduced size of the printed figure? (The consequence of making the slightest changes in the figures of the galley proof is that in most cases *new blocks* must be made.) Your figure material will be returned to you after publication of the article.
5. Is there a *separate* list of the figure captions? (All figures should have captions.)
6. Is the list of references complete, in accordance with the convention of the journal and are all author's initials given in all references?
7. Is a copy of the manuscript and copies of its figures attached to the original manuscript?

INFORMATION FOR ADVERTISERS

Advertising orders and enquiries can be sent to the Advertising Manager, North-Holland Publishing Co., Journal Division, P.O. Box 211, Amsterdam, The Netherlands.

U.S.A. Mrs. Leni Ellinger, 3133 Connecticut Avenue, N.W., Suite 712, Washington, D.C. 20008.

France. Régie Publicité Industrielle, 36, rue du Fer-à-Moulin, Paris 5e, Tél. 707-53-39.

United Kingdom. T. G. Scott & Son Ltd., 30-32 Southampton Street, London WC2E 7HR.

Nuclear Instruments and Methods is published semi-monthly. The subscription price of a volume is Hfl. 275.00 ($ 112.50), postage not included.
Subscriptions should be sent to the publishers, North-Holland Publishing Company, P.O. Box 211, Amsterdam, or to any subscription-agent.
Claims for missing numbers should be made within three months, following the date of publication. The publishers expect to supply missing numbers free only when losses have been sustained in transit and when the reserve stock will permit.

SUBJECT INDEX

Accelerators, Beam Handling and Targets

Radiation damage flux characteristics in DIDO type reactors. Use of the GAMIN technique, J. P. Genthon, B. T. Kelly and S. B. Wright **131** (1975) 1
Experimental simulation of a free jet gas target neutron generator, J. H. Deleeuw, A. A. Haasz, P. C. Stangeby, D. T. Tong and J. E. Robinson **131** (1975) 203
Ice charge transport in an electrostatic belt generator, A. Vermeer and B. A. Strasters **131** (1975) 213
Magnetic trim rods for superconducting cyclotrons, C. B. Bigham **131** (1975) 223
Electroplating of osmium (*Letter to the Editor*), Ryuichi Arakawa, Tadashi Saito and Kiyoteru Otozai . . . **131** (1975) 369
Investigation of small-volume gaseous discharge ion sources for isotope separation on-line (*Letter to the Editor*), R. Kirchner and E. Roeckl **131** (1975) 371
Analysis of voltage surges in Van de Graaff accelerators using transmission lines, J. A. Staniforth **131** (1975) 393
A liquid target for in-beam experiments, A. Kardontchik and R. Kalish **131** (1975) 399
Measurement of the apparent non-linearity of analyzing magnets, S. K. Gupta, M. S. Bhatia and S. S. Kerekatte . . **131** (1975) 403
Nouvelle source d'ions multichargés à hautes performances, P. Briand, R. Geller, B. Jacquot et C. Jacquot . . **131** (1975) 407
Voltage calibration of proton accelerators in the 200 keV – 3.5 MeV region (*Letter to the editor*), T. R. Ward . . **131** (1975) 553
Beam stop failure – a potential hazard in tritium gas targets (*Letter to the editor*), J. David Carlson **131** (1975) 555
Energy stabilization of an isochronous cyclotron beam with an external monochromator control, F. Hinterberger, P. v. Rossen and K. Euler. **133** (1976) 1
Examination of frequency dependence of a generating voltmeter, H. H. Prabhakara, A. B. Bagwan, G. K. Mehta and T. R. Vishwanathan **133** (1976) 9
The polarized proton and deuteron beam at the Bonn isochronous cyclotron, K. G. Bauer, R. Enders, W. Hammon, K. D. Krause, D. Lesemann, A. Scholzen, K. Euler and B. Schüller. **133** (1976) 13
Investigation of gaseous discharge ion sources for isotope separation on-line, R. Kirchner and E. Roeckl **133** (1976) 187
A simple heavy-ion beam monitor, M. N. Varma **133** (1976) 205
Performance of the SNAKE, a device to adjust the shape of a magnet field boundary, A. G. Drentje, R. J. De Meijer, H. A. Enge and S. B. Kowalski **133** (1976) 209
Investigations on sources and targets of polarized alkali nuclei, H. Ebinghaus, U. Holm, K. Tietgen, D. Wegmann and F. Wittchow. **133** (1976) 393
A beam burst width monitoring and phase stabilization system for cyclotrons, J. W. Watson, C. A. Miller and F. J. Wilson **133** (1976) 399
A novel focussing element for increasing the flux in the Fermilab electron beam, R. J. Morrison and F. V. Murphy . **133** (1976) 403
Dynamic beam cleaning by a nonlinear resonance, A. W. Chao and M. Month. **133** (1976) 405
A foil stripper assembly with large foil capacity (*Letter to the Editor*), J. S. Harrison, C. J. Hill, T. R. Ophel and D. C. Weisser **133** (1976) 575
A cryo-pumped gas target for the study of radiative capture reactions, K. W. Allen, S. P. Dolan, A. R. Holmes, T. J. M. Symons, F. Watt, C. H. Zimmerman, A. E. Litherland and A. M. J. Sandorfi **134** (1976) 1
Quantity production of polarized target material, W. Ash **134** (1976) 9
Temperatures of thin targets in a pulsed electron beam, F. Nickel **134** (1976) 11
Verbesetzung der Strahlimpuls-Folgefrequenz beim Hamburger Isochronzyklotron, H. Krause, R. Langkau und N. Schirm **134** (1976) 15
Strahlabtastsystem für Teilchenbeschleuniger, J.-H. Meier und F.-W. Richter **134** (1976) 213
A new type of belt for Van de Graaff type electrostatic generators, B. R. Prabhakar and H. V. Gopalakrishna . . **134** (1976) 217
A general ion-optical correction element, H. D. Ferguson, J. E. Spencer and K. Halbach **134** (1976) 409
A corrective element for high resolution magnetic optics, G. Blanpied, R. Liljestrand, G. W. Hoffmann and J. E. Spencer **134** (1976) 421
Measurement of the average energy of the proton beam from the Dubna synchrocyclotron by the double reflection method by using Vavilov–Cherenkov radiation, V. P. Zrelov, V. P. Lupiltsev and M. F. Shabashov . . . **134** (1976) 437
A versatile neutron beam filter facility with silicon and iron filters, F. Y. Tsang and R. M. Brugger **134** (1976) 441
Calculation and optimization of stray fields of septum dipole magnets, A. J. T. Holmes **134** (1976) 473
Ion beam studies. Part I: The retardation of ion beams to very low energies in an implantation accelerator, J. H. Freeman, W. Temple, D. Beanland and G. A. Gard **135** (1976) 1
Ion beam studies. Part II: A calorimetric method for ion beam studies, C. E. Christodoulides and J. H. Freeman **135** (1976) 13
A cryostat for forming solid krypton or xenon targets for use in capture gamma-ray experiments, C. M. Jensen, W. M. Buckley, R. G. Lanier, G. L. Struble, S. G. Prussin and D. H. White **135** (1976) 21
An electroformed gas target for electron scattering, I. P. Auer and H. S. Caplan **135** (1976) 27
Isochronous cyclotron harmonic beam space charge effect, M. L. Mallory, K. N. Fischer and E. D. Hudson . . **135** (1976) 29
The periplasmatron, an ion source for intense neutral beams, M. Fumelli and F. P. G. Valckx **135** (1976) 203

Preparation of isotopic oxygen targets via the anodic oxidation of tantalum (*Letter to the Editor*), D. Phillips and J. P. S. Pringle 135 (1976) 38
Preparation of self-supporting ^{142}Ce and ^{140}Ce targets for cyclotron bombardments (*Letter to the Editor*), J. D. Sherman 135 (1976) 39
On the insertion of a spatially transverse magnetic field in an electron storage ring (*Letter to the Editor*), G. Brautti and V. Stagno 135 (1976) 39
Properties of spiral loaded cavities, A. Schempp and H. Klein 135 (1976) 40
Method for rapid evaluation of accelerator pulsed beam time performance (*Letter to the Editor*), J. D. Carlson . 135 (1976) 56
Analysis of the high frequency longitudinal instability of bunched beams using a computer model, E. Messerschmid and M. Month 136 (1976)
Axial injection of H^- ions into the University of Manitoba variable energy cyclotron, R. A. Batten, J. Bruckshaw, I. Gusdal, G. Knote, A. McIlwain, J. S. C. McKee and S. Oh 136 (1976)
Optimization of half-wavelength helices, A. Schempp and H. Klein 136 (1976)
The design and performance of a halo-free intense extracted proton beam at Fermilab, B. Cox and C. T. Murphy . 136 (1976)
Target foil motion, W. C. Corwin 136 (1976)
The acceleration of deuterons by the University of Manitoba variable energy cyclotron (*Letter to the Editor*), I. Gusdal, G. Knote, A. McIlwain, J. S. C. McKee, S. Oh and H. W. Uzat 136 (1976) 39
The preparation of silicon films suitable for studies of electron-induced fission (*Letter to the Editor*), A. M. Sandorfi, L. R. Kilius and J. L. Gallant 136 (1976) 39
Ion beam studies. Part IIIa: The modelling of electrostatic mirrors for the manipulation and focussing of heavy ions, D. G. Beanland and J. H. Freeman 136 (1976) 40
Beam tests of a superconducting niobium cavity for a heavy ion accelerator, P. H. Ceperley, J. Sokolowski, I. Ben-Zvi, H. F. Glavish and S. S. Hanna 136 (1976) 42
Cryogenic propane source of cold neutrons, M. G. Zemlyanov, S. P. Mironov, V. P. Stepanov, G. F. Syrykh and N. A. Chernoplekov 136 (1976) 42
A surface-ionization ion source designed for in-beam operation with the BEMS-2 isotope separator, D. D.Bogdanov, J. Vobořil, A. V. Demyanov, V. A. Karnaukhov and L. A. Petrov 136 (1976) 43
Nanosecond megajoule accelerator for beam induced thermonuclear microexplosions, F. Winterberg 136 (1976) 47
A simple class of beam transport systems with optically axisymmetric transfer properties, K. Halbach 136 (1976) 44
Electron bunching on a high-current Linac, B. Kulke 136 (1976) 44
Design and operating characteristics of a simple alkali ion gun, I. Terzić, M. Tošić and D. Ćirić 137 (1976)
A radial-longitudinal coupling effect for cyclotrons with a one-dee system, W. M. Schulte and H. L. Hagedoorn . . 137 (1976)
High voltage tests with the MP-Tandem at Munich, W. Assmann, H. Münzer, L. Rohrer and S. J. Skorka 137 (1976)
Two synchronously vibrating single crystals as a new type of high efficiency neutron chopper, P. Mikula, R. T. Michalec and J. Vávra 137 (1976) 2
Säulenwiderstände für einen EN-Tandem (*Letter to the Editor*), W. Kreische 137 (1976) 19
A non-destructive bunch length monitor for a proton linear accelerator, R. L. Witkover 137 (1976) 20
Increased cyclotron beam intensity using a harmonic beam interceptor (*Letter to the Editor*), M. L. Mallory, E. D. Hudson and J. W. Hale 137 (1976) 37
Uranium films for targets (*Letter to the Editor*), J. Buch, N. I. Balalikin, A. V. Skripnik and V. V. Katrasev . 137 (1976) 38
Methode zur rückwirkungsfreien Messung eines Ionenstrahls (*Letter to the Editor*), R. Reimann 137 (1976) 38
Differentiated-effect shims for medium field levels and saturation. Their use in matching the bending strength of an accelerator's magnets at two field levels, A. Riche 137 (1976) 40
Validity of analytical expressions for orbit parameters in AVF cyclotrons with large field modulation (*Letter to the Editor*), W. Schulte and H. L. Hagedoorn 137 (1976) 58
Phase-free ac acceleration as second-order effect (*Letter to the Editor*), H. Daniel 137 (1976) 58
The design of a cascaded 800 MeV normal conducting C.W. race track microtron, H. Herminghaus, A. Feder, K. H. Kaiser, W. Manz and H. v.d. Schmitt 138 (1976)
High-pressure gas target for the production of intense fast-neutron beams, W. Von Witsch and J. G. Willaschek 138 (1976) 1
The superconducting split ring resonator as an accelerating structure, G. J. Dick, T. Yogi, J. R. Delayen, J. E. Mercereau, G. D. Sprouse and T. M. Cormier 138 (1976) 20
A high intensity heavy-ion recoil-target system, J. M. Nitschke 138 (1976) 39
Improvement of the emittance of a Middleton type sputter source, G. Ihmels, E. Jaeschke and R. Repnow . . . 138 (1976) 40
Uniformity of aluminium foils, C. J. Sofield, J. A. Cookson, J. M. Freeman and K. Parthasaradhi 138 (1976) 41
A fast-closing vacuum valve for the Berkeley 88-inch cyclotron, R. A. Gough, R. Lam, C. Martinez and D. Morris 138 (1976) 41
A method for the acceleration of radioactive nuclei, M. L. Mallory and G. S. McNeilly 138 (1976) 42
Fermilab magnet mapping system, R. Yamada, J. Dinkel, R. J. Wojslaw and C. D. Buchanan 138 (1976) 56
A low gradient thin yokes magnetic quadrupole with rectangular aperture, M. Conte, G. Manuzio and G. Stringa 138 (1976) 57
Beam-pulsing system for the IMS cyclotron, Y. Yoshida, H. Nakayama, K. Nakai and T. Yamazaki 138 (1976) 57
The intense low-momentum kaon beam at the Argonne ZGS, E. Colton 138 (1976) 58
Acceleration of electrons in the focus of a laser-beam, R. Rossmanith 138 (1976) 61
Evaluation of electron trajectories in an arc discharge, Holger Hinkel 139 (1976)
Practical factors affecting cathode performance in ion sources of the Nier–Bernas type, G. Lempert and I. Chavet . . 139 (1976)

uopigatron metal ion source, B. H. Wolf . . . 139 (1976) 13
eams and sources: A theme with variations, J. D. Lawson . . . 139 (1976) 17
n ion beam instrumentation simulator as a tool for analyzing and designing ion beam systems, W. W. Hicks, J. H. Keller, R. H. Benner, J. R. Winnard, T. R. Puzak and S. Schmidt . . . 139 (1976) 25
ne steering and manipulation of ion beams for low-energy heavy ion accelerators, D. G. Beanland and J. H. Freeman . . . 139 (1976) 33
igh current electrostatic deflector and scanner, J. H. Keller, D. K. Coultas, W. W. Hicks and J. R. Winnard . . 139 (1976) 41
actors affecting beam shape and quality, I. Chavet, M. Kanter and M. Menat . . . 139 (1976) 47
review on rf-separators, Franz R. Krueger . . . 139 (1976) 55
xperimental results on MEIRA characteristics and some typical operational problems, G. Lempert, I. Chavet and M. Kanter . . . 139 (1976) 57
udy of the secondary effects of the sparking of an E.M.I.S. application to the design of a hv power supply, B. Rosenbaum, S. Equilbey and A. Marion . . . 139 (1976) 65
high performance hv power supply and an ion source automatic control system, M. Kanter and I. Chavet . . . 139 (1976) 69
variable geometry multipocket collector for electromagnetic sector separators, Rudolf Wagner . . . 139 (1976) 73
retardation collector system for special target preparation with an isotope separator, Erich Hechtl . . . 139 (1976) 79
he preparation of ^{166}Er targets for in-beam experiments, K. Freitag, Christel Heising, F. J. Kappes and W. Schaub . . . 139 (1976) 83
me new techniques and recent developments in isotope separations at Oak Ridge, E. Newman, W. A. Bell, Jr., W. C. Davis, L. O. Love, W. K. Prater, K. A. Spainhour, J. G. Tracy and A. M. Veach . . . 139 (1976) 87
ecent electromagnetic separation work with "SIDONIE II" at KFA Jülich, Dirk Brüning, Hans R. Ihle, Hans Lipperts, Albrecht Neubert and Rudolf Wagner . . . 139 (1976) 95
rogress report on separators SIDONIE and PARIS, Robert Meunier, Jean Camplan, Jean-Luc Bonneval, Jean-Louis Daban-Haurou, Dominique Deboffle, Didier Leclercq, Marguerite Ligonnière and Guy Moroy . . . 139 (1976) 101
pplication of the method of internal reduction to the separation of the radionuclide ^{133}Ba, Dirk Brüning, Hans R. Ihle, Hans Lipperts and Rudolf Wagner . . . 139 (1976) 105
are earths isotopic separation after recoiling in a tantalum foil, J. Blachot, R. Brissot, S. Dousson and L. Fremion 139 (1976) 109
he effect of collisions with a background gas on the velocity slip isotope separation process, P. Raghuraman, P. Davidovits and J. B. Anderson . . . 139 (1976) 115
otope separation using plasma heating at the two-ion resonance, J. L. Hirshfield . . . 139 (1976) 119
he design philosophy for a 200 kV industrial high current ion implanter, D. Aitken . . . 139 (1976) 125
ange of heavy ions implanted into solids as measured by He ion backscattering, D. C. Santry and R. D. Werner . 139 (1976) 135
on bombardment chemistry, G. K. Wolf . . . 139 (1976) 147
he fraction of ions in unique sites after implantation into cubic and non-cubic metals derived from hyperfine interaction studies, K. Freitag . . . 139 (1976) 153
topping cross section measurements with heavy ions in the keV energy range in gases by time-of-flight spectroscopy, V. Martini . . . 139 (1976) 163
Nuclear reaction studies using on-line separated, radioactive targets, Göran Andersson . . . 139 (1976) 169
Use of an electromagnetic isotope separator in the search for element 114 in nature, John McMinn, Hans R. Ihle and Rudolf Wagner . . . 139 (1976) 175
Electron and positron spectroscopy coupled to E.M. isotope separation, J. S. Dionisio, Ch. Vieu, C. M. Truong and G. Levy . . . 139 (1976) 181
onization of nonvolatile organic compounds by fast heavy ions and their separation by mass spectrometry, O. Becker, N. Fürstenau, F. R. Krueger, G. Weiß and K. Wien . . . 139 (1976) 195
Analyzing features of recoil spectrometers, K. Sistemich . . . 139 (1976) 203
The recoil separator Lohengrin: performance and special features for experiments, P. Armbruster, M. Asghar, J. P. Bocquet, R. Decker, H. Ewald, J. Greif, E. Moll, B. Pfeiffer, H. Schrader, F. Schussler, G. Siegert and H. Wollnik . . . 139 (1976) 213
Report on the heavy ion separator SIS at the GSI, H. Ewald, K. Güttner, G. Münzenberg, P. Armbruster, W. Faust, S. Hofmann, K. H. Schmidt, W. Schneider and K. Valli . . . 139 (1976) 223
Progress report on the Jülich gas-filled separator JOSEF, H. Lawin, J. W. Borgs, R. Fabbri, J. W. Grüter, T. A. Khan, W. D. Lauppe, G. Sadler, H. A. Selič, M. Shaanan, K. Sistemich and P. Armbruster . . . 139 (1976) 227
A static field mass spectrograph for laser induced plasma experiments, M. Oron . . . 139 (1976) 235
The on-line mass separator OSIRIS and the study of short-lived fission products, G. Rudstam . . . 139 (1976) 239
Development of the Orsay high current on-line separator ISOCELE, P. Paris, V. Berg, A. Caruette, J. Obert, J. C. Putaux and J. L. Sarrouy . . . 139 (1976) 251
Target developments at TRISTAN, W. L. Talbert, Jr., F. K. Wohn, A. R. Landin, J. C. Päcer, R. L. Gill, M. A. Cullison, G. A. Sheppard, K. A. Burke, K. L. Malaby and A. F. Voigt . . . 139 (1976) 257
New techniques at ISOLDE-2, H. L. Ravn, L. C. Carraz, J. Denimal, E. Kugler, M. Skarestad, S. Sundell and L. Westgaard . . . 139 (1976) 267
The mass separator facility on-line to the heavy-ion accelerator UNILAC at Darmstadt, K. H. Burkard, W. Dumanski, R. Kirchner, O. Klepper and E. Roeckl . . . 139 (1976) 275
Progress in targets and ion sources for on-line separators, H. L. Ravn . . . 139 (1976) 281

A novel ISOL ion source, R. KIRCHNER and E. ROECKL 139 (1976) 291
A recent source modification for noble gasses at the Los Alamos on-line mass analysis facility, Silvio J. BALESTRINI and Leon FORMAN 139 (1976) 297
The UNISOR integrated target-ion source, R. L. MLEKODAJ, E. H. SPEJEWSKI, H. K. CARTER and A. G. SCHMIDT . . 139 (1976) 299
Experiments with the surface ionization integrated target-ion source of the SOLIS, S. AMIEL, G. ENGLER, Y. NIR-EL and M. SHMID 139 (1976) 305
Principles behind a He-jet system and its application for isotope separation, H. WOLLNIK 139 (1976) 311
Connection experiments with a hollow cathode ion source and a helium gas jet system for on-line isotope separation, A. K. MAZUMDAR, H. WAGNER, W. WALCHER and T. LUND 139 (1976) 319
Efficiency of an on-line isotope separator system employing cooled and NaCl-loaded He-jet methods, J. ÄYSTÖ, V. RANTALA, K. VALLI, S. HILLEBRAND, M. KORTELAHTI, K. ESKOLA and T. RAUNEMAA 139 (1976) 325
Optical investigation of a gas-jet system, W. J. HILLER and W.-D. SCHMIDT-OTT 139 (1976) 331
The Chalk River helium jet and skimmer system, H. SCHMEING, V. KOSLOWSKY, M. WIGHTMAN, J. C. HARDY, J. A. MACDONALD, T. FAESTERMANN, H. R. ANDREWS, J. S. GEIGER and R. L. GRAHAM 139 (1976) 335
On-line gas phase chemistry as a method for Z separation, Knut BÄCHMANN, Volker MATSCHOß, Jochen RUDOLPH, Adolf STEFFEN and Stamatios TSALAS 139 (1976) 343
The UNISOR ISOL data acquisition system, H. K. CARTER, E. H. SPEJEWSKI, R. L. MLEKODAJ, A. G. SCHMIDT, F. T. AVIGNONE, C. R. BINGHAM, R. A. BRAGA, J. D. COLE, A. V. RAMAYYA, J. H. HAMILTON, E. L. ROBINSON, K. S. R. SASTRY and E. F. ZGANJAR 139 (1976) 349
A fast tape transport system for use with on-line separators, J. A. MACDONALD, J. C. HARDY, H. SCHMEING, N. C. BRAY, W. PERRY, R. B. WALKER and M. WIGHTMAN 139 (1976) 355
Measurements on spiral resonators at high field levels, A. SCHEMPP, W. ROHRBACH and H. KLEIN 140 (1977) 1
Cyclotron precession injection with a new magnet configuration in the central region, W. A. VAN KAMPEN and J. LIEDORP 140 (1977) 219
A superconducting magnet polarized proton target for low energy nuclear scattering experiments, M. EISEND, K. FRANK, J. KOLLMANN, D. KRÖNIGER, H. KUIPER, K. KUTSCHERA, H. OBERMEYER and B. SEIDLER 140 (1977) 227
Standing-wave triperiodic structure for a 10 MeV medical accelerator, A. BENSUSSAN, D. T. TRAN and D. TRONC . . . 140 (1977) 231

Computer Automated Measurement and Control

The status of CAMAC in 1976, R. C. M. BARNES 137 (1976) 3
Use of PROMs for CAMAC function decoding, J. C. BEECH 137 (1976) 9
A CAMAC controller for a flexible disk drive *(Letter to the Editor)*, F. K. MCNEIL-WATSON 137 (1976) 193
A CAMAC-CAMAC linkage module to interface between computers, N. KAJIURA, I. ARAI, T. FUJII, H. IKEDA, T. KAMAE, S. KAWABATA, K. NAKAMURA, K. OGAWA and H. TAKEDA 138 (1976) 681
A compact time digitizer in CAMAC format, D. FREYTAG 138 (1976) 685
Specification of a CAMAC single crate controller with DMA-option for PDP-11 computers, H. BARTHEL, W. HEEP and J. G. OTTES 138 (1976) 691
Multichannel remotely programmable logic delay system, D. BROWN, A. GREENWOOD, J. C. PRATT and J. E. SPENCER 138 (1976) 695
Software to drive a GEC Elliot CAMAC interface on a PDP-11 computer running the RSX-11M executive, C. LENGAUER and A. SILVERMAN 140 (1977) 577

Instruments and Methods for High-Energy Physics

Experimental investigation of proposed transition effect in particle ionisation loss, G. C. SMITH and E. MATHIESON . . 131 (1975) 13
Design of the LAMPF low-energy pion channel, R. L. BURMAN, R. L. FULTON and M. JAKOBSON 131 (1975) 29
Adaptable-geometry, low-mass hodoscopes using cathode read-out proportional chambers, M. DAVIER, M. G. D. GILCHRIESE and D. W. G. S. LEITH 131 (1975) 229
Energy deposition in thick targets by high energy protons: measurement and calculation, M. AWSCHALOM, P. J. GOLLON, C. MOORE and A. VAN GINNEKEN 131 (1975) 235
Transition radiation from electrons at low gamma values, C. CAMPS, V. COMMICHAU, M. DEUTSCHMANN, H. GÖDDEKE, K. HANGARTER, W. LIESMANN, U. PÜTZHOFEN and R. SCHULTE 131 (1975) 411
Equilibrium charge state distributions of high energy heavy ions, R. B. CLARK, I. S. GRANT, R. KING, D. A. EASTHAM and T. JOY 135 (1976) 17
Observation of the relativistic rise in bubble density in a neon-hydrogen bubble chamber, C. M. FISHER, J. G. GUY and W. A. VENUS 133 (1976) 29
Distributions of secondary particles around various targets exposed to 50 MeV protons, A. FASSÒ and M. HÖFERT . 133 (1976) 213
Multiwire proportional chamber spectrometer for the CERN Intersecting Storage Rings, L. BAKSAY, A. BÖHM, H. FOETH, A. STAUDE, W. LOCKMAN, T. MEYER, J. RANDER, P. SCHLEIN, R. WEBB, M. BOZZO, R. ELLIS, B. NAROSKA, C. RUBBIA and P. STROLIN 133 (1976) 219
Measuring the length and the time structure of the electron bunch in electron storage rings by single photon timing,

R. Lopez-delgado, J. A. Miehe, B. Sipp and H. Zyngier . . . 133 (1976) 231
Automatic track counting in gamma-exposed polymer foils with a jumping spark counter (*Letter to the Editor*), M. Várnagy, E. Gyarmati and T. Sztaricskai . . . 133 (1976) 371
Off-line detection of kinks along bubble chamber tracks, J. Hanton, J. Schlesinger and J. Skura . . . 134 (1976) 21
A new method to measure electrons in a heavy liquid bubble chamber (*Letter to the Editor*), F. Jacquet, P. Miné and P. Van Quaethem . . . 134 (1976) 197
"Frozen spin" polarized target, T. O. Niinikoski and F. Udo . . . 134 (1976) 219
Optimum measurement and analysis of small polarization asymmetry in high-energy inelastic scattering using a polarized target, T. O. Niinikoski . . . 134 (1976) 235
I_2; an absolute pion beam flux monitor, E. A. Wadlinger . . . 134 (1976) 243
Measurement of $\pi^- p \to \pi^0 n$ differential cross-sections using a NaI(Tl) photon spectrometer, W. Bayer, H. Hilscher, W. O'Connell, H. Schmitt, Č. Zupančič, L. H. Guex, C. Joseph, M. T. Tran, B. Vaucher, E. Winkelmann and P. Truöl . . . 134 (1976) 449
Beam-cavity interaction effects in multi-cavity storage rings, A. Papiernik, M. Chatard-Moulin and B. Jecko . . 134 (1976) 487
A high stopping density μ^+ beam, A. E. Pifer, T. Bowen and K. R. Kendall . . . 135 (1976) 39
An on-line detection system for the external visualization of the stopping region in pion radiotherapy, G. H. Eaton, H. Kaspar, F. Požar, K. Shrager and P. Shrager . . . 135 (1976) 211
The high density multigap projection chamber – a target detector for high energy particles, K. Geissler, A. Scharding and A. Breskin . . . 135 (1976) 415
Large proportional multiwire chambers for transition radiation detection with unambiguous position readout, J. Fischer, J. Fuhrmann, S. Iwata, R. Palmer and V.Radeka . . . 136 (1976) 19
Very high energy electron–positron coillding beams for the study of weak interactions, B. Richter . . . 136 (1976) 47
A pion and muon magnetic trap as a source of electron and muon neutrinos, V. M. Lobashev and O. V. Serdyuk . 136 (1976) 61
Matching of bubble chamber tracks using parameters to represent the tracks, L. A. Dunn . . . 136 (1976) 203
Analysis of $N\bar{K}\pi$ final states using a simplified variation of the prism plot method, B. Pollock and P. J. Dornan . 136 (1976) 207
Radiation damage to electronic components, S. Battisti, R. Bossart, H. Schönbacher and M. Van De Voorde . 136 (1976) 451
Strong turbulence and the anomalous length of stored particle beams, P. J. Channell and A. M. Sessler . . . 136 (1976) 473
Development of a 150 m^2 proportional chamber system with a 1 million bit buffer. The EMI for BEBC, C. Brand, R. C. A. Brown, E. Chesi, H. Foeth, A. Gilgrass, H. J. Hilke, D. Jacobs, P. Lazeyras and Y. Sacquin . . 136 (1976) 485
The use of rise-time information in drift or proportional chambers for neutral radiation localization, A. Breskin, G. Charpak and F. Sauli . . . 136 (1976) 497
Measurements of energy flow distributions of 10 GeV/c hadronic showers in iron and in aluminium, B. Friend, A. King, D. Kiss, W. Schmidt-Parzefall, K. Winter, F. Niebergall and W. Wilmsen . . . 136 (1976) 505
A high-resolution hodoscope using a spherical mirror *(Letter to the Editor)*, A. Gonidec, A. Kupferschmid and K. Kuroda . . . 137 (1976) 387
Calibration of deuteron polarization in a deuterated polarized target, K. Guckelsberger and F. Udo . . . 137 (1976) 415
Depolarisation in large electron storage rings, D. Möhl and B. W. Montague . . . 137 (1976) 423
Performance of a lead-glass detector for high-energy γ-rays, F. Dydak, G. Laverrière, F. L. Navarria, P. Steffen, P. Schilly, E. G. H. Williams, H. Taureg and M. Vysočanský . . . 137 (1976) 427
Geometry calculations for angular distribution measurements of recoil products of high-energy nuclear reactions, C. R. Rudy, N. T. Porile and S. B. Kaufman . . . 138 (1976) 19
Implantation d'un calculateur pour controler l'exploitation de la chambre à bulles à hydrogène liquide MIRABELLE, J. L. Augueres, G. Comby et D. Duvallet . . . 138 (1976) 25
Measurements of doses produced by high energy beams on thick targets, A. Esposito, F. Lucci and M. Pelliccioni . . 138 (1976) 209
Superheated superconducting suspension as transition radiation detector, A. K. Drukier and L. C. L. Yuan . . 138 (1976) 213
Polarized muonic beam with variable helicity, S. V. Golovkin, M. I. Grachev, V. I. Gridasov, V. P. Danshin, R. I. Djelyadin, A. M. Zaitsev, V. F. Konstantinov, V. I. Kotov, V. P. Kubarovsky, L. G. Landsberg, V. M. Leontiev, V. A. Mukhin, T. I. Petrunina and Yu. S. Khodyrev . . . 138 (1976) 235
An extension of the generator functional technique; the general method of the correction of detection losses in high energy measurements, L. Diósi . . . 138 (1976) 241
The external muon identifier for the Fermilab 15 ft bubble chamber, R. J. Cence, F. A. Harris, S. I. Parker, M. W. Peters, V. Z. Peterson, V. J. Stenger, G. Lynch, J. Marriner, F. Solmitz and M. L. Stevenson . . 138 (1976) 245
Measurement of photon showers in lead produced by electrons of 150 MeV, H. Göringer, H. J. Von Eyß and B. Schoch . . . 138 (1976) 425
A description of drift chambers used in a Fermilab experiment, R. Thun, C. W. Akerlof, P. Alley, D. Koltick, R. L. Loveless, D. I. Meyer, M. Zumberge, D. Bintinger, R. A. Lundy, D. D. Yovanovitch, W. R. Ditzler, D. A. Finley, F. J. Loeffler, E. I. Shibata and K. C. Stanfield . . . 138 (1976) 437
The general purpose 1 GeV/c separated beam at the Argonne ZGS, E. Colton . . . 138 (1976) 599
Ionization measurements with an HPD in the analysis of $\bar{p}p$ interactions at 7.3 GeV/c, G. W. van Apeldoorn, P. H. A. van Dam, D. Harting, F. G. Hartjes, L. O. Hertzberger, D. J. Holthuizen, W. M. van Leeuwen, M. M. H. M. Rijssenbeek, C. Voetelink and J. M. Warmerdam-de Leeuw . . . 138 (1976) 621
Transition and synchrotron radiation produced by electrons and particle discrimination, B. Merkel, J.-P. Repellin, G. Sauvage, M. Bourquin, J. C. Chollet, M. Dialinas, J.-M. Gaillard, A. Hrisoho and Ph. Jean . . . 138 (1976) 625

A simple and fast system for analysis of charged particle tracks in multiplane hodoscopes, J. P. Reuter **140** (1977) 237
A high-intensity low-momentum separated antiproton beam for the study of annihilations at rest, G. Bassompierre, G. Binder, P. Dalpiaz, P. F. Dalpiaz, M. Ferro-Luzzi, G. Gissinger, S. Jacquey, C. Peroni, F. M. Schmitt, M. A. Scheegans and L. Tecchio **140** (1977) 251
Bidimensional drift chamber, B. Yu. Baldin, S. I. Bityukov, Yu. N. Vrazhnov, V. I. Kryshkin and R. M. Sulyaev **140** (1977) 409
Transition radiators for electron identification at the CERN ISR, J. Cobb, C. W. Fabjan, S. Iwata, C. Kourkoumelis, A. J. Lankford, G.-C. Moneti, A. Nappi, R. Palmer, P. Rehak, W. Struczinski and W. Willis **140** (1977) 413
Solid state micro-detectors for high energy experiments, A. Kanofsky **140** (1977) 429
Use of a streamer chamber to study particle–nuclei interactions, A. Kanofsky **140** (1977) 433
Determination of photon coordinate in a hodoscopy Cherenkov spectrometer, G. A. Akopdjanov, A. V. Inyakin, V. A. Kachanov, R. N. Krasnokutsky, A. A. Lednev, Yu. V. Mikhailov, Yu. D. Prokoshkin, E. A. Razuvaev and R. S. Shuvalov **140** (1977) 441

Instruments for Nuclear Spectroscopy

Performance of the VTL PEPR vertex guidance system, L. A. Dunn, R. Harris, R. G. Kenyon, H. J. Lubatti and K. Moriyasu **131** (1975) 1
Low mass cylindrical multiwire proportional chamber with unambiguous dual coordinate readout, P. Schübelin, J. Fuhrmann, S. Iwata, V. Radeka, W. N. Schreiner, F. Turkot, A. Weitsch and R. W. Sancton . . . **131** (1975) 3
A 4π scintillation counter-optical spark chamber system for neutral particles, C. Demarzo, A. Distante, L. Guerriero, C. Niccolini, F. Posa, F. Waldner, G. T. Y. Chen, C. R. Fletcher, R. E. Lanou, Jr., R. K. Thornton, D. S. Barton, T. Lyons, M. Marx, L. Rosenson and R. Thern **131** (1975) 4
Energy resolution of thin silicon semiconductor ΔE detectors for alpha particles and heavy ions, V. V. Avdeichikov, E. A. Ganza and O. V. Lozhkin **131** (1975) 6
Digital selector of coincidences for the absolute measurement of radioactivity, Jean-Jacques Gostely and Olivier Noverraz **131** (1975) 6
Efficiency of Ge(Li) and Si(Li) planar detectors in the 2–5 keV energy range, B. Rosner, D. Gur and L. Shabason . . **131** (1975) 8
Mise en évidence des régimes de fonctionnement d'une cathode à pointe utilisant l'émission T. F., Louis Thalamas, Marie Pilod et Pierre Pilod **131** (1975) 8
The role of pre-irradiation annealing in changing the track development characteristics of glass track detectors, Hameed A. Khan and Ishfaq Ahmad **131** (1975) 8
Off center gamma ray detection efficiencies of cylindrical single open ended (SOE) Ge(Li) detectors, A. P. Kushelevski and Z. B. Alfassi **131** (1975) 9
A fast charge digitizer and digital data acquisition system for measurement of time varying radiation fields, Thomas R. Lee and Roger H. Schneider **131** (1975) 9
The 434 keV gamma ray of $^{108}Ag^{m}$ as a new energy standard (*Letter to the Editor*), Tsuneo Morii and Tadashi Saito **131** (1975) 197
Detector cross registration in recent doubly radiative np capture measurements (*Letter to the Editor*), H. C. Lee and E. D. Earle **131** (1975) 199
Electron-transport solenoid for nuclear spectroscopic investigations, D. Varga and Do Ban An **131** (1975) 243
Drift velocities of electrons, saturation characteristics of ionization and W-values for conversion electrons in liquid argon, liquid argon-gas mixtures and liquid xenon, Eido Shibamura, Akira Hitachi, Tadayoshi Doke, Tan Takahashi, Shinzou Kubota and Mitsuhiro Miyajima **131** (1975) 249
An automatic correction of the photoefficiency in Ge(Li)-spectrometry, W. Görner, G. Noa, D. Peters and H. J. Grosser **131** (1975) 417
A thin-film detector system for laser-fusion studies, Tai Ho Tan, A. H. Williams and G. H. McCall **131** (1975) 425
On track localization in self-shunted helium-filled streamer chambers, I. V. Falomkin, M. M. Kulyukin, E. D. Lozansky, V. I. Lyashenko, Nguyen Minh Kao, G. B. Pontecorvo, T. M. Troshev, Yu. A. Shcherbakov, L. Busso and G. Piragino **131** (1975) 431
Range modulators for protons and heavy ions, A. M. Koehler, R. J. Schneider and J. M. Sisterson **131** (1975) 437
A cryostat and temperature regulation system for very slow continuous cooling and heating experiments, H. Meister and C. M. E. Zeyen **131** (1975) 441
Development of parallel-plate avalanche counters for the detection of fission fragments, G. Hempel, F. Hopkins and G. Schatz **131** (1975) 445
Measurement of the reflectivities and absorption lengths at different wavelengths of plastic scintillator and acrylglass. Calculations of the light attenuation in large area detectors, G. Kettenring **131** (1975) 451
A particular application of GaSe semiconductor detectors in the neutrino experiment at CERN, C. Manfredotti, R. Murri, A. Quirini and L. Vasanelli **131** (1975) 457
Theory and operation of a neutron diffractometer with a curved monochromator made from perfect Si-lamellae, F. Frey and W. Prandl **131** (1975) 463
Pulse shape from counters with gaseous multiplication, J. Sanada and Y. Fujita **131** (1975) 469
Note on the relation between efficiency and volume of Ge(Li) detectors (*Letter to the Editor*), E. Somorjai **131** (1975) 557

proportional counter for efficient Mössbauer scattering experiments (*Letter to the Editor*), R. A. Levy, P. A. Flynn and R. A. Hartzell **131** (1975) 559
modular system of multigap proportional chambers (*Letter to the Editor*), M. Cavalli-Sforza, G. Goggi, G. Iuvino, M. Livan, G. Magnani, B. Rossini and A. Vicini **131** (1975) 579
onte Carlo calculation of the intrinsic gamma ray efficiencies of cylindrical NaI(Tl) detectors, B. Grosswendt and E. Waibel **133** (1976) 25
neutron capture γ-ray spectrometer for use at an electron LINAC, M. L. Stelts and J. C. Browne **133** (1976) 35
small-angle scattering spectrometer for polarized neutrons, M. Hetzelt and A. Heidemann **133** (1976) 51
h the counting rate-dependent amplitude shifts in proportional counters, K. Mahesh **133** (1976) 57
two-parameter spectrometer for unidirectional neutrons from about 5 to 200 MeV, R. Madey, F. M. Waterman and A. R. Baldwin **133** (1976) 61
h the technique of preparation of high quality thin film scintillators, N. N. Ajitanand and K. N. Iyengar **133** (1976) 71
lculated performance of a segmented pyramid-shaped calorimeter of iron and plastic, J. D. Amburgey and T. A. Gabriel **133** (1976) 75
operties of a two-axis spectrometer as a slow neutron monochromator, J. McCarthy, C. Majkrzak and S. Malik **133** (1976) 83
rformance of a scintillation counter stack used to measure proton momenta by range and dE/dX, J. J. Blaising, O. Callot and R. Morand **133** (1976) 93
b-nanosecond plastic scintillators (*Letter to the Editor*), P. B. Lyons, C. R. Hurlbut and L. P. Hocker **133** (1976) 175
haracteristics and performance of the Orsay magnetic detector DM1, A. Cordier, B. Delcourt, P. Eschstruth, F. Fulda, G. Grosdidier, J. Haissinski, J. Jeanjean, M. Jeanjean, R. Madaras, J. L. Masnou, J. Perez-y-Jorba, A. Quenzer, F. Rumpf, J. L. Bertrand, J. C. Bizot and R. L. Chase **133** (1976) 237
single-coil dc-operated neutron-spin flipper, B. Van Laar, F. Maniawski and P. E. Mijnarends **133** (1976) 241
vestigation of the effects of induced electric fields on the efficiency of neon flash tubes, J. M. Breare and P. J. Doe **133** (1976) 247
nergy resolution of the proportional counter, H. Sipilä **133** (1976) 251
neutron detector for measurement of total neutron production cross sections, K. K. Sekharan, H. Laumer, B. D. Kern and F. Gabbard **133** (1976) 253
ten-fold divided total absorption Ge(Li) gamma-ray detector, P. Suominen and T. Lahtinen **133** (1976) 259
he manufacture of needle type Si(Li) detectors for bio-medical use, L. Birstein, F. Li and R. Klawer **133** (1976) 279
ariations in the response of an electron multiplier across its active area (*Letter to the Editor*), S. L. Prunty and C. F. G. Delaney **133** (1976) 369
large area parallel plate avalanche counter, H. Stelzer **133** (1976) 409
ome characteristics of high pressure Ne–He–CH_4 filled flash tubes, J. M. Breare, B. C. Nandi and I. D. Tait . . . **133** (1976) 415
liquid helium cryostat coupled to an electromagnetic isotope separator for in situ Mössbauer effect measurements on implanted sources, S. A. Drentje and S. R. Reintsema **133** (1976) 421
cintillation spectrometer for high energy neutrons using hydrocarbon filaments, K. N. Geller and R. I. Cutler . . **133** (1976) 425
roperties of high pressure nitrogen–argon and nitrogen–xenon gas scintillators, W. Tornow, H. Huck, H.-J. Köber and G. Mertens **133** (1976) 435
he role of contacts to nuclear radiation detectors, P. A. Tove **133** (1976) 445
Multilayer Fe–Co mirror polarizing neutron guide, G. M. Drabkin, A. I. Okorokov, A. F. S'chebetov, N. V. Borovikova, A. G. Gukasov, V. A. Kudriashov, V. V. Runov and D. A. Korneev **133** (1976) 453
A high energy beta spectrometer using an intrinsic germanium crystal in a super-conducting solenoid, R. B. Moore, S. I. Hayakawa and D. M. Rehfield **133** (1976) 457
A fast, good resolution high-multiplicity trigger, A. M. Jonckheere, R. G. Kenyon and W. O. Wallick **133** (1976) 465
Radiation damage to ^{3}He proportional counter tubes (*Letter to the Editor*), A. E. Evans, H. O. Menlove, R. B. Walton and D. B. Smith **133** (1976) 577
A simple Si(p) detector for β- and X-ray spectroscopy (*Letter to the Editor*), V. V. Avdeichikov, E. A. Ganza and V. P. Prikhodtseva **133** (1976) 579
Time structure of gas scintillation proportional counter signals, R. D. Andresen, L. Karlsson and B. G. Taylor **134** (1976) 25
A blue light-emitting diode for use in calibrating and monitoring the gains of photomultipliers, P. N. Johnson and D. W. L. Tolfree **134** (1976) 29
Properties of low-pressure drift chambers, A. Breskin and N. Trautner **134** (1976) 35
A large proportional drift chamber with two-dimensional read-out, H. J. Von Eyss, H. Krohn, K. P. Sternemann and M. Tonutti **134** (1976) 47
nstallation of a dilution refrigerator at a polarized neutron facility, H. W. Weber, G. P. Westphal and R. Goblirsch **134** (1976) 55
A study of the properties of a prototype multiwire drift chamber spectrometer, D. A. Wilkening, G. L. Roshon and S. H. Aronson **134** (1976) 61
A large area circular position sensitive Si detector, J. E. Lamport, G. M. Mason, M. A. Perkins and A. J. Tuzzolino **134** (1976) 71
Study of light collection process from cylindrical scintillators, M. Moszyński **134** (1976) 77
The calculated response of a liquid-scintillator total-absorption hadron calorimeter, R. T. Santoro, J. D. Amburgey and T. A. Gabriel **134** (1976) 87
sotope separator on-line at INS FM cyclotron , Y. Yoshizawa, H. Noma, T. Horiguchi, T. Katoh, S. Amemiya, M. Itoh, K. Hisatake, M. Sekikawa and K. Chida **134** (1976) 93
^{252}Cf neutron irradiation facilities, Cs. M. Buczkó, M. H. Al-Mundheri, J. Csikai and Z. Dezsö **134** (1976) 101

A multi-input wide dynamic range ADC system for use with nuclear detectors, R. W. Austin . . . 134 (1976) 249
Usability of track detectors in mixed fields of neutron and gamma rays, M. A. Gomaa and M. A. El-Kolaly . . 134 (1976) 253
Cyclic activation flux monitor, G. C. Meggitt . . . 134 (1976) 257
A large area time-of-flight system with a resolution of 0.5 ns fwhm, W. Braunschweig, E. Königs, W. Sturm and W. Wallraff . . . 134 (1976) 261
Two dimensional readout of a multiwire proportional chamber using a helical delay line, B. Sitar, R.J. Stubbs and J. M. Breare . . . 134 (1976) 267
Calculated performance of iron-argon and iron-plastic calorimeters for incident hadrons with energies of 5 to 75 GeV, T. A. Gabriel and W. Schmidt . . . 134 (1976) 271
Radiogauge for adsorbate concentration in adsorbent bed, A. Notea, C. Aharoni and Y. Segal . . . 134 (1976) 339
An optical-control system for high voltage terminals (*Letter to the Editor*), J. J. Bicek, P. J. Billquist and J. L. Yntema . . . 134 (1976) 401
Proportional counter filled with highly purified liquid xenon (*Letter to the Editor*), M. Miyajima, K. Masuda, A. Hitachi, T. Doke, T. Takahashi, S. Konno, T. Hamada, S. Kubota, A. Nakamoto and E. Shibamura . . 134 /1976) 403
Wavelength-shifted Cherenkov radiators, E. P. Krider, V. L. Jacobson, A. E. Pifer, P. A. Polakos and R. J. Kurz 134 (1976) 495
The effect of charge trapping on the spectrometric performance of n-type CdTe surface-barrier detectors, J. Iwańczyk and A. J. Dąbrowski . . . 134 (1976) 505
Compteur plastique à localisation spatiale et à temps de vol destiné à la détection des neutrons de 2 à 200 MeV, E. Hourani, S. Kobayashi, F. Reide, T. Yuasa et F. Coçu . . . 134 (1976) 513
An extremely low-background beta–gamma coincidence spectrometer, K. Yamakoshi and K. Nogami . . . 134 (1976) 519
Development research on a highly luminous condensed xenon scintillator, A. Lansiart, A. Seigneur, J.-L. Moretti and J.-P. Morucci . . . 135 (1976)
A resolution monitor for neutron time-of-flight spectrometers, G. H. R. Kegel . . . 135 (1976)
Multiwire corona chambers with small wire spacing, B. Sitar, R. J. Stubbs and J. M. Breare . . . 135 (1976)
A design of a velocimeter using a radioactive positron emitting source without lead collimators, H. Heusala and R. Myllylä . . . 135 (1976)
An ionization-chamber type of focal-plane detector for heavy ions, J. R. Erskine, T. H. Braid and J. C. Stoltzfus 135 (1976)
Germanium spectrometers with internal junctions, H. L. Malm . . . 135 (1976)
Effects of nuclear radiation on the optical properties of cerium-doped glass, B. McGrath, H. Schönbacher and M. van de Voorde . . . 135 (1976)
A permanently sealed multiwire proportional chamber with two-dimensional readout for X-ray applications in the region 20–60 keV (*Letter to the Editor*), A. Dwuraźny, M. Waligórski, K. Jeleń and K. W. Ostrowski . . 135 (1976)
Neutron howitzer design, M. Pracy and A. K. M. M. Haque . . . 135 (1976)
Aperture and counting rate of rectangular telescopes for single and multiple parallel particles, B. D'Ettore Piazzoli, G. Mannocchi, S. Melone, P. Picchi and R. Visentin . . . 135 (1976)
Spatial resolution in a xenon filled MWPC X-ray imaging detector – a computing physics approach, J. E. Bateman, M. W. Waters and R. E. Jones . . . 135 (1976)
Differential Cherenkov counters for use at high momenta, R. L. Anderson and J. A. Grant . . . 135 (1976)
A large aperture neutron time-of-flight spectrometer, A. Del Guerra, A. Giazotto, M. A. Giorgi, A. Stefanini, D. R. Botterill, D. W. Braben, D. Clarke and P. R. Norton . . . 135 (1976)
Hardware processor for data reduction task in the field of experimental high energy nuclear physics, P. Bacilieri, A. Ghiselli and M. Masetti . . . 135 (1976)
The LASS hardware processor, P. F. Kunz . . . 135 (1976)
Neutron scintillating glasses: part 1. Activation by external charged particles and thermal neutrons, A. R. Spowart 135 (1976)
A proton recoil telescope for 12–20 MeV neutrons, T. B. Ryves . . . 135 (1976)
Quadrupole magnet field measuring equipment at TRIUMF, P. A. Reeve, T. R. Gatrighi and R. D. Fyvie . . . 135 (1976)
An improvement of the RI Auger electron thickness gauge for the measurement of thin metal films, N. Ishigure, C. Mori and T. Watanabe . . . 135 (1976)
Installation of a pre-injection ion source-Z/M analyser system on the 5.5 MV Van de Graaff accelerator at Trombay, S. N. Misra, S. K. Gupta and M. K. Mehta . . . 135 (1976)
A position-determining scintillator for small angle neutron scattering measurements, V. Giordano, G. Manduchi, M. T. Russo-Manduchi and G. F. Segato . . . 135 (1976)
Improved performance of HgI_2 spectrometers in the low energy X-ray region (*Letter to the Editor*), W. Seibt, M. Slapa and G. C. Huth . . . 135 (1976)
Ghost peaks in a sector-focusing magnetic β-ray spectrometer (*Letter to the Editor*), J. Kayser and K.-W. Hoffmann 135 (1976)
An isotope separator beam position stabilizer of high sensitivity, H. D. Skank . . . 136 (1976)
A high resolution multiwire proportional chamber system, W. Frieze, S. Dhawan, A. A. Disco, L. Fajardo, R. Majka, J. N. Marx, P. Némethy, J. Sandweiss and A. J. Slaughter . . . 136 (1976)
Use of silica aerogel for Cherenkov radiation counter, M. Bourdinaud, J. B. Cheze and J. C. Thevenin . . . 136 (1976)
A stable light pulser for gain stabilizing photomultiplier tubes (*Letter to the Editor*), C. L. Morris, W. J. Braithwaite and C. F. Moore . . . 136 (1976)
The multipole element of the Q3D spectrograph for correction of the kinematic broadening, H. J. Scheerer, H. Vonach, M. Löffler, A. v. d. Decken, M. Goldschmidt, C. A. Wiedner and H. A. Enge . . . 136 (1976)

radioactive current generator for routine calibration of electrometers, I. S. Sundararao, R. Vadiwala and G. Subrahmanian . . . 136 (1976) 225
ar threshold response of a wave-shifted Cherenkov radiator to heavy ions, S. P. Ahlen, B. G. Cartwright and G. Tarlé . . . 136 (1976) 235
iquid ^{3}He detector for fast neutrons, R. Van Staa, J. Reher and B. Zeitnitz . . . 136 (1976) 241
rite-induction orbit current and beam position detectors for a variable energy racetrack microtron, J. J. Manca and H. R. Froelich . . . 136 (1976) 249
e influence of Ge(Li) detector pulse shape variations on constant fraction and snap-off timing discriminators, L. L. Gadeken and B. C. Robertson . . . 136 (1976) 255
pazitive Sonde für Phasenmessungen an einem gepulsten Ionenstrahl (*Letter to the Editor*), R. Reimann . . . 136 (1976) 397
proposal for a combined scintillation-image-intensifier section for application in gamma-camera (*Letter to the Editor*) B. Shafrir and A. Seidman . . . 136 (1976) 399
dual wire beam-scanner, A. McIlwain . . . 136 (1976) 511
rect current stabilization of scintillation counters used for uranium prospecting, H. J. Fraser . . . 136 (1976) 513
te effect on the digitisation pulse height from Ne–He–CH_4 filled flash tubes, J. M. Breare, B. C. Nandi and I. D. Tait . . . 136 (1976) 517
/o specialized delayed-neutron detector designs for assays of fissionable elements in water and sediment samples, S. J. Balestrini, J. P. Balagna and H. O. Menlove . . . 136 (1976) 521
velopment of a large, low-mass, water Cherenkov counter, J. Button-Shafer, H. W. Churchill, R. L. Lichti and D. H. Novack . . . 137 (1976) 29
ding characteristics of different thermoluminescent dosimeters, B. Burgkhardt, R. Herrera and E. Piesch . . 137 (1976) 41
ray photocathodes for image intensifiers and large area thick window detectors, N. G. Alexandropoulos . . . 137 (1976) 49
intillator glasses with short radiation lengths, Y. Yoshimura, I. Suzuki, M. Matsukawa, F. Komorita, M. Minowa and Y. Suzuki . . . 137 (1976) 57
new photomultiplier tube utilising channel plate electron multipliers as the gain producing elements, J. E. Bateman, R. J. Apsimon and F. E. Barlow . . . 137 (1976) 61
otoneutron production in detectors in high energy X-ray beams, A. P. Kushelevsky and G. Shani . . . 137 (1976) 71
rallel wire drift chamber with variable field shaping wire voltages, U. Nauenberg and G. Schultz . . . 137 (1976) 213
study of a time-of-flight system used as a directional counter in gamma-ray astronomy telescopes, H. Rothermel . 137 (1976) 219
st of a lead/liquid argon electromagnetic shower detector, D. Hitlin, J. F. Martin, C. C. Morehouse, G. S. Abrams, D. Briggs, W. Carithers, S. Cooper, R. Devoe, C. Friedberg, D. Marsh, S. Shannon, E. Vella and J. S. Whitaker . . . 137 (1976) 225
4π CaF_2(Eu) scintillation spectrometer for measurements with X-ray and electron sources, M. Campbell, K. W. D. Ledingham, A. D. Baillie and J. G. Lynch . . . 137 (1976) 235
simple efficient method of delay-line termination and timing-signals extraction in position-sensitive proportional counters (*Letter to the Editor*), M. Birk, A. Breskin and N. Trautner . . . 137 (1976) 393
ne harmonic drive as UHV rotary motion feedthrough, E. De Haas . . . 137 (1976) 435
ne thermoluminescence behaviour of LiF(TLD-100) for doses up to 10 MRad, S. Charalambous and Ch. Petridou . . . 137 (1976) 441
égradation du rapport signal sur bruit de fond apporté par un restaurateur de ligne de base, K. L. Henein . . . 137 (1976) 445
ydrogen streamer chamber with localizing admixtures (*Letter to the Editor*), I. V. Falomkin, V. I. Lyashenko, Nguyen Min Kao, G. B. Pontecorvo, Yu. A. Shcherbakov, T. M. Troshev, N. I. Trosheva, L. Busso and G. Piragino . . . 137 (1976) 589
new thermoluminescent detector for 14.7 MeV neutrons (*Letter to the Editor*), F. Spurný, M. Králík, R. Médioni and G. Portal . . . 137 (1976) 593
novel large-acceptance threshold gas Cherenkov counter, I. Ambats, E. R. Hayes, C. E. W. Ward, W. E. Keig, D. A. Park, E. C. Swallow, R. Winston and T. A. Romanowski . . . 138 (1976) 61
n and electron trajectories in mirror-type ion–electron converters, W. O. Hofer and U. Littmark . . . 138 (1976) 67
large pressurized Cherenkov counter, G. B. Bowden, R. C. Field, R. A. Lewis, C. T. Hoard, K. Skarpaas and P. Baker . . . 138 (1976) 77
irect synthesis of the Gaussian filter for nuclear pulse amplifiers, S. Ohkawa, M. Yoshizawa and K. Husimi . . 138 (1976) 85
esponse of plastic scintillator detectors to heavy ions, $Z \leq 35$, $E \leq 170$ MeV, F. D. Becchetti, C. E. Thorn and M. J. Levine . . . 138 (1976) 93
nvestigation of a system of drift chambers at the Dubna synchrophasotron, S. P. Chernenko, A. S. Chvyrov, V. M. Golovatyuk, N. N. Govorun, I. M. Ivanchenko, A. B. Ivanov, M. N. Khachaturian, V. A. Kramarenko, M. N. Mikhailova, P. V. Mojsenz, V. D. Peshekhonov, A. E. Senner, B. M. Starchenko, L. N. Strunov and Yu. V. Zanevsky . . . 138 (1976) 105
evelopment of a plutonium–americium monitor for in situ soil surface and pond bottom assay, K. K. Nielson, C. W. Thomas, N. A. Wogman and R. L. Brodzinski . . . 138 (1976) 227
scattering chamber with rotatable lid at the INS Sector Focusing Cyclotron, F. Soga, M. Tanaka and T. Hasegawa 138 (1976) 255
compact high pressure gas Cherenkov counter for electrons, K. Königsmann, G. Lenzen and D. Menze . . . 138 (1976) 267
esponse functions of organic scintillators to high energy neutrons, J. A. Lockwood, C. Chen, L. A. Friling, D. Swartz, R. N. St. Onge, A. Galonsky and R. R. Doering . . . 138 (1976) 353

Semiconductor Si(npn) detector with two surface-barrier junctions *(Letter to the Editor)*, V. V. Avdeichikov . . . **138** (1976) 3
The noise analysis and optimum filtering techniques for a two-dimensional position sensitive orthogonal strip gamma ray detector employing resistive charge division, M. S. Gerber and D. W. Miller . . . **138** (1976) 4
The application of alternate polarity HT fields to neon flash tubes, J. M. Breare, B. C. Nandi and I. D. Tait . . **138** (1976) 4
Design of an in-core fast neutron generator, B. A. Napier, J. P. Holland, S. D. Howe, W. J. Mikols, E. F. Glynn, J. F. Merklin and N. D. Eckhoff . . . **138** (1976) 4
On the performance of a high rate gamma spectroscopy system, G. P. Westphal . . . **138** (1976) 4
An apparatus for electrochemical etching of recoil particle tracks in plastic foils *(Letter to the Editor)*, J. H. Thorngate, D. J. Christian and C. P. Littleton . . . **138** (1976) 5
Supralinearity of thermoluminescent dosimeters, L. Larsson and R. Katz . . . **138** (1976) 6
Solid state nuclear track detectors for neutron yield estimation, M. A. Gomaa . . . **138** (1976) 6
Large aperture gas Cherenkov counters with good rejection of slow particles, J. Heintze, W. Kalbreier, H. Rieseberg, H. W. Siebert and K.-P. Streit . . . **138** (1976) 6
Multichannel remotely programmable logic delay system, D. Brown, A. Greenwood, J. C. Pratt and J. E. Spencer **138** (1976) 6
A storage device for relativistic electrons consisting of a phase-free cavity resonator and two magnetic mirrors, H. Zinner, W. Schott and H. Daniel . . . **140** (1977)
Neutron scintillating glasses: part II. The effects of temperature on pulse height and conductivity, A. R. Spowart . . **140** (1977)
Position-sensitive detector for heavy atomic particles in the keV energy range, J. Østgaard Olsen . . . **140** (1977)
A magnetic lens coincidence spectrometer with reduced spherical aberration, J. C. E. Jennings and M. Underwood . **140** (1977)
Surface coils to improve the homogeneity of a given magnet, U. Czok, G. Moritz and H. Wollnik . . . **140** (1977)
A pulsed source for polarized electrons with high repetition rate, W. von Drachenfels, I. T. Koch, Th. M. Müller, W. Paul and H. R. Schaefer . . . **140** (1977)
A method of protection for the Geiger-Müller counter hodoscope against noise from the wide gap spark chambers *(Letter to the Editor)*, J. Zabierowski . . . **140** (1977)
The "flight chamber": A fast, large area, zero-time detector *(Letter to the Editor)*, N. Trautner . . . **140** (1977)
The Harwell backscattering spectrometer, C. G. Windsor, L. J. Bunce, P. H. Borcherds, I. Cole, M. Fitzmaurice, D. A. G. Johnson and R. N. Sinclair . . . **140** (1977)
A proportional chamber with a drift gap for ionization measurements, V. M. Golovatyuk, V. D. Peshekhonov and Yu. V. Zanevsky . . . **140** (1977)
A pressurized multiwire proportional counter for electrons, T. Kitahara, Y. Isozumi and S. Ito . . . **140** (1977)
A high-frequency magnetic chopper for polarized neutrons, K. Weise, A. Mehl and W. Weirauch . . . **140** (1977)
A ^{3}He cooled cryostat with large cooling power for polarized targets, M. Fukushima, N. Horikawa, R. Kajikawa, H. Kobayakawa, T. Nakanishi, K. Mori, S. Okumi, C. O. Pak, S. Suzuki, T. Ohshima, T. Matsuda and N. Tokuda . . . **140** (1977)
Direct time-to-digital converter with multi-stop facility, S. J. Hall and A. M. MacLeod . . . **140** (1977)
Inert gas mixtures for porportional counters *(Letter to the Editor)*, H. Sipilä . . . **140** (1977)
A simple low-cost cryogenic controller *(Letter to the Editor)*, I. V. Mitchell . . . **140** (1977)
Revised energy responses of ^{6}LiF and ^{7}LiF thermoluminescence dosimeters to neutrons *(Letter to the Editor)*, S. Tanaka and Y. Furuta . . . **140** (1977)
A simple sputtering system for nuclear-science applications, S. W. Eckroad, R. E. Leber and A. Ghiorso . . . **140** (1977)
Low pressure limit of the Bayard-Alpert gauge, C. Benvenuti and M. Hauer . . . **140** (1977)
A two-dimensional drift chamber, M. Atac, R. Bosshard S. Erhan and P. Schlein . . . **140** (1977)
A single-channel counting rate monitor *(Letter to the Editor)*, R. R. Gingerich, C. W. Schulte and J. L. Campbell . **140** (1977)

Methods for Nuclear Spectroscopy

The effect of pre-etching on the properties of CN-track detectors, H. B. Lück . . . **131** (1975)
A method to determine the ratio of the Planck constant to the neutron mass, Winfried Weirauch . . . **131** (1975)
Deconvolution of Doppler broadened spectra of positron annihilation photons, Steen Dannefaer and Donald P. Kerr . . . **131** (1975)
Microdensitometric measurements of neutron-induced recoil tracks in plastics and their applications for fast neutron dosimetry, G. M. Hassib . . . **131** (1975)
Holographic processing of track chamber data, Yury A. Bykovsky, Alexandr I. Larkin, Anatoly A. Markilov and Sergej N. Starikov . . . **131** (1975)
Determination of detector efficiencies for gamma ray energies up to 12 MeV. I. Experimental methods, E. Waibel and B. Grosswendt . . . **131** (1975)
Simple theory concerning the emission efficiency and energy deposition of electrons produced in a slab exposed to 1.25 MeV gamma rays, Susumu Minato . . . **131** (1975)
Simplification of the water bath method for calibrating a Ra-Be neutron source, Masatoshi Fujishiro, Tatsuo Tabata and Junichiro Furuta . . . **131** (1975)
A method for the measurement of proton beam energies below 400 keV, Z. E. Switkowski and P. D. Parker . . **131** (1975)
Suggested X-ray pulses with ultrashort risetimes, Paul L. Csonka . . . **131** (1975)

Multiple scattering of heavy ions through ΔE Si surface barrier detectors, R. J. PUIGH, K. W. KEMPER, G. E. MOORE and A. F. ZELLER **131** (1975) 291
Experimental criteria for light nuclide analysis by coincident measurement of complementary particles, P. P. COETZEE, R. PRETORIUS and M. PEISACH **131** (1975) 299
An improved method for time-of-flight spectroscopy with an incompletely pulsed cyclotron beam (*Letter to the Editor*), B. SIEBERT and R. JAHR **131** (1975) 375
Elimination of charging in the proton-induced X-ray emission analysis of insulating samples (*Letter to the Editor*), M. AHLBERG, G. JOHANSSON and K. MALMQVIST **131** (1975) 377
Simple depth profile determination by proton-induced X-ray emission (*Letter to the Editor*), M. AHLBERG **131** (1975) 381
A method to detect and identify ^{8}Be (*Letter to the Editor*), J. LANG, A. BUTA, R. MÜLLER and J. UNTERNÄHRER **131** (1975) 385
A single detector method for the determination of P_{K_1} in ^{133}Ba, W. F. NICAISE and A. W. WALTNER **131** (1975) 477
A method to compensate the energy loss of a continuous stacked beam with a large momentum spread, W. WILHELM and W. SCHOTT **131** (1975) 481
Depolarization effects in stripping a polarized negative ion beam, G. G. OHLSEN, P. A. LOVOI, R. A. HARDEKOPF, R. L. WALTER and P. W. LISOWSKI **131** (1975) 489
Timing with large area plastic scintillator counters, C. CERNIGOI, N. GRION and G. PAULI **131** (1975) 495
Trace element analysis in thick targets by charged particle induced X-rays, BIJOY K. PATNAIK and N. G. DHERE . . . **131** (1975) 503
Analyse sous helium par la technique de fluorescence X induite par protons (*Letter to the Editor*), R. MODJTAHED-ZADEH, B. RASTEGAR, A. GALLMANN, G. GUILLAUME, F. JUNDT et P. SIOSHANSI **131** (1975) 563
Deposition of thin films using an isotope separator (*Letter to the Editor*), R. P. W. LAWSON, J. H. FREEMAN, J. S. COLLIGON, W. A. GRANT, M. J. NOBES and J. S. WILLIAMS **131** (1975) 567
The ^{16}O(γ,4p5n)^{7}Be reaction as a monitor of intermediate-energy bremsstrahlung doses (*Letter to the Editor*), J. B. MARTINS, O. A. P. TAVARES, M. L. TERRANOVA and V. DI NAPOLI **131** (1975) 569
Excitation and ionization states of ions penetrating solids, S. DATZ **132** (1976) 7
Equilibrium excitation of heavy ions penetrating through solids, H.-D. BETZ **132** (1976) 19
Lifetime measurements of prompt multiplet transitions in highly stripped projectile ions, H. PANKE, F. BELL, H.-D. BETZ and W. STEHLING **132** (1976) 25
Lifetime studies of Ar-2p vacancies travelling through solids, L. C. FELDMAN, P. J. SILVERMAN and R. J. FORTNER . **132** (1976) 29
Penetration of swift ion clusters through solids, W. BRANDT and R. H. RITCHIE **132** (1976) 43
Propagation of swift atomic clusters through solids, W. BRANDT, R. LAUBERT and A. RATKOWSKI **132** (1976) 57
Some new effects seen in the passage of swift ion clusters through solids, D. S. GEMMELL, J. REMILLIEUX, J.-C. POIZAT, M. J. GAILLARD, R. E. HOLLAND and Z. VAGER **132** (1976) 61
The dependence of H_2^+ molecular-ion yields on the proton neutral fraction, M. J. GAILLARD, J.-C. POIZAT, A. RATKOWSKI and J. REMILLIEUX **132** (1976) 69
Sensitivity of the electronic stopping power to the shell structure of the target material, D. J. LAND and J. G. BRENNAN **132** (1976) 89
The tunneling theory of the electronic stopping power of the planar channeling of ions in the range of some ten kilo-electronvolts, P. HAYMANN **132** (1976) 99
Bloch wave treatment of electron channeling, J. GJÖNNES and J. TAFTÖ **132** (1976) 141
Planar dechanneling studies in Diamond type lattices, D. V. MORGAN and D. P. JACKSON **132** (1976) 153
A new method of nuclear lifetime measurement by using single crystals, F. FUJIMOTO, K. KOMAKI, M. MARUYAMA, K. OZAWA and Y. SUGIYAMA **132** (1976) 175
Applications of beam foil spectroscopy to atomic collisions in solids, I. A. SELLIN **132** (1976) 397
An electron–electron coincidence spectrometer adapted for in-beam measurement of short nuclear lifetimes, J. LINDSKOG and L.-G. SVENSSON **133** (1976) 99
Application of track formation theory to calibration of photometric measurements on cosmic ray tracks in nuclear emulsion, S. BEHRNETZ **133** (1976) 113
An unfolding procedure for charged particle spectra and its application to the measurement of stopping power, J. C. COMISO, F. SCHLEPUETZ and K. O. H. ZIOCK **133** (1976) 121
Detection of neutrons of intermediate energy using ^{10}B, enclosed in a coaxial Ge(Li) counter, A. HUCK, G. KLOTZ and G. WALTER **133** (1976) 125
Bremsstrahlung-activation ablation gauge for tungsten nosetip ablation during atmospheric reentry, V. V. VERBINSKI, D. G. COSTELLO and H. L. MOODY **133** (1976) 131
Identification of weak lines in gamma-ray spectra, V. HNATOWICZ **133** (1976) 137
On the stability conditions of elastic current-carrying floating wire in tracing charged particle trajectories, M. S. KOSODAEV **133** (1976) 143
A method to obtain the unchanged energy calibration in the pulse height analyser for a gas filled ΔE-proportional counter at different filling pressures, M. L. CHATTERJEE **133** (1976) 275
Particle discrimination by an automatic scanner for nuclear emulsion plates, W. HEINECKE and B. E. FISCHER . . . **133** (1976) 283
Measurement of ^{125}I by liquid scintillation methods, D. L. HORROCKS **133** (1976) 293
Localisation of the discharge in the multiwire corona counter and the possibility of building a counter with two-dimensional read-out (*Letter to the Editor*), B. SITAR, R. J. STUBBS and J. M. BREARE **133** (1976) 375
Mesure de l'activité effective d'une source α intense (*Letter to the Editor*), A. M. POINTU, A. K. S. ALLAF et M. FITAIRE **133** (1976) 377

A new method for the quantitative determination of the species present in a mixture of hydrogen isotopes, I. Lewkowicz and M. Givon . . . 133 (1976) 47
Techniques for particle identification and energy measurement of helium ions in the intermediate energy range, N. Chirapatpimol, J. C. Fong, M. M. Gazzaly, G. Igo, A. D. Liberman, R. J. Ridge, S. L. Verbeck, C. A. Whitten, Jr., J. Arvieux and V. Perez-Mendez . . . 133 (1976) 47
Amplitude–time analysis for recoil nuclei in projection chamber, A. O. Gasparyan, V. M. Kukarev, E. P. Markaryan, G. G. Mkrtchyan and R. N. Pikhtelev . . . 133 (1976) 48
Pore size from resonant charged particle backscattering, C. D. Mackenzie and B. H. Armitage . . . 133 (1976) 48
Usage of a termoluminescence dosimeter as a thermal neutron detector with high sensitivity, S. I. Tanaka and Y. Furuta . . . 133 (1976) 49
Separation of alkaline earth from alkali metal fission products in the solar on-line mass spectrometer, P. L. Reeder, L. J. Alquist, J. Lin and J. F. Wright . . . 133 (1976) 50
On the Mössbauer spectra comparison, F. Aramu, V. Maxia and C. Muntoni . . . 133 (1976) 50
Ion-simulated irradiation-induced creep, P. L. Hendrick, D. J. Michel, A. G. Pieper, R. E. Surratt and A. L. Bement, Jr. . . . 133 (1976) 50
Electron–proton separation with a liquid argon–lead sandwich detector, J. Engler, W. Hofmann, J. Spengler and D. Wegener . . . 133 (1976) 52
Two useful methods for energy calibration in DSA measurements (*Letter to the Editor*), H. P. Nottrodt, F. Rauch and P. Hübener . . . 133 (1976) 58
Comments on the few-step discontinuous stopping technique in DSAM (*Letter to the Editor*), B. M. Latta, B. C. Robertson and P. J. Scanlon . . . 133 (1976) 58
Remarks to the comments on the few-step discontinuous stopping technique (*Letter to the Editor*), M. Kregar, M. Vakselj and P. Rupnik . . . 133 (1976) 58
Triple-focussing electron spectrum selector for in-beam conversion electron spectroscopy, H. Ejiri, T. Shibata, Y. Nagai and S. Nakayama . . . 134 (1976) 10
Large area mosaic solid-state detectors for low yield fission study, H. Yamamoto, Y. Mori, Y. Wakuta and M. Sonoda . . . 134 (1976) 11
Range of electrons and positrons, T. Mukoyama . . . 134 (1976) 12
Nonlinear least-squares fitting without matrix inversion applied to complex gaussian spectra analysis, I. A. Slavić 134 (1976) 28
A small-sample method for studying γ-ray angular distributions from the $(n,n'\gamma)$ reaction, J. M. Davidson, H. R. Hooper, D. M. Sheppard and G. C. Neilson . . . 134 (1976) 29
Study of the catcherfoil technique with the aid of ^{252}Cf s.f. and $^{235}U(n_{th}, f)$, H. Thierens, D. De Frenne, E. Jacobs, A. De Clercq, P. D'Hondt and A. J. Deruytter . . . 134 (1976) 29
Electronic measurements of nuclear lifetimes in the region 1 ps $< \tau <$ 100 ps, A. Kluge and W. Thomas . . . 134 (1976) 52
Production of medium-energy neutrons from proton bombardment of light elements using revised neutron–proton differential cross sections, J. L. Romero, F. P. Brady and J. A. Jungerman . . . 134 (1976) 53
Multigroup electron transport, D. W. Van De Putte and D. J. Cusens . . . 134 (1976) 54
Verfahren zur massenspektrometrischen Messung von Zerfallskonstantenvariationen an Tritiumverbindungen, K.-P. Dostal und E. D. Pabst . . . 135 (1976) 9
Particle identification with very thin transmission detectors, D. G. Perry and L. P. Remsberg . . . 135 (1976) 10
Possibility of on-line analysis of very short-lived nuclei with the aid of a spectrograph equipped with a laser ion source, J. F. Eloy and J. P. Zirnheld . . . 135 (1976) 11
A new detector for the study of angular effects in ^{57}Fe conversion electron Mössbauer spectroscopy, M. J. Tricker, A. G. Freeman, A. P. Winterbottom and J. M. Thomas . . . 135 (1976) 11
Thorium-uranium fission radiography, E. L. Haines, J. R. Weiss, D. S. Burnett and Dorothy S. Woolum . . . 135 (1976) 12
Low energy heavy cosmic ions charge discrimination with plastic detectors, J. Sequeiros, J. Medina, A. Durá, M. Ortega, A. Vidal-Quadras, F. Fernández and R. T. Thorne . . . 135 (1976) 13
Proton polarimetry using an Enge split-pole spectrograph, J. M. Moss, D. R. Brown and W. D. Cornelius . . . 135 (1976) 13
An optical method for the precise determination of scattering angles in nuclear physics geometries, A. Bockisch, P.-J. Dickers, W. Klein and A. M. Kleinfeld . . . 135 (1976) 14
Production and transport of conduction electrons in a liquid argon ionization chamber, W. Hofmann, U. Klein, M. Schulz, J. Spengler and D. Wegener . . . 135 (1976) 15
X-ray energy-dispersive powder diffractometry using synchrotron radiation (*Letter to the Editor*), B. Buras, J. S. Olsen and L. Gerward . . . 135 (1976) 19
Radiometric calorimetry: a review. 1976 supplement, S. R. Gunn . . . 135 (1976) 25
Importance de la reduction de focalisation dans un champ de fuite etendu, A. G. Elayi . . . 135 (1976) 28
A single crystal silicon thermal neutron filter, R. M. Brugger . . . 135 (1976) 28
Track revelation in solid state track recorders utilising the light guide principle, G. P. Dixon and J. G. Williams 135 (1976) 29
New techniques for polarization of a neutron beam by magnetic mirrors, B. Hamelin . . . 135 (1976) 29
Calibration of a modular plastic scintillator neutron detector in the kinetic energy range 100–500 MeV, J. Bailey, D. R. Botterill, D. Clarke, H. E. Montgomery, P. R. Norton, G. Matone, A. Del Guerra, A. Giazotto, M. A. Giorgi and A. Stefanini . . . 135 (1976) 33
Determination of beam-foil lifetimes $\lesssim$ 100 ps with a grazing-incidence spectrometer, E. Träbert, H. Winter,

P. H. Heckmann and H. v. Buttlar 135 (1976) 353
method for the determination of polar scattering angles, I. Koersner and B. Sundqvist 135 (1976) 359
n absolute recoil-proton photoneutron spectrometer using a Monte Carlo calculated efficiency (*Letter to the Editor*), J. Devos, R. van de Vyver, E. van Camp, R. Carchon and H. Ferdinande 135 (1976) 395
alibration of an analyzing magnet using an α-source and heavy-ion beams (*Letter to the Editor*), E. E. Gross . . 135 (1976) 401
simple method for studying the linearity and resolution of position-sensitive detectors (*Letter to the Editor*), R. E. White and H. Naylor 135 (1976) 403
leasurement of damage distributions in ion bombarded Si, GaP and GaAs at 50 K, R. S. Walker and D. A. Thompson 135 (1976) 489
amb shift polarimeter of the slow proton beam, Yu. A. Pliss and L. M. Soroko 135 (1976) 497
ptimum counting time of decaying source in presence of constant background, G. C. Meggitt 135 (1976) 503
he measurement of the coordinates of high energy γ-quanta with a total absorption spectrometer, M. N. Khachaturian and G. L. Melkumov 135 (1976) 505
se of the large gadolinium-loaded liquid scintillator technique for (n,2n) and (n,3n) cross section measurements, J. Frehaut 135 (1976) 511
comparison of reactor and linac techniques for neutron diffraction studies of molecular liquids, J. C. Dore and J. H. Clarke 136 (1976) 79
polarization of fast neutrons by Mott–Schwinger scattering from collimator walls, R. Fischer, R. Maschuw, R. Schrader and B. Zeitnitz 136 (1976) 105
bsolute calibration of a well-type NaI-detector to an accuracy of 0.3–0.1%, W. Mannhart and H. Vonach . . . 136 (1976) 109
simple energy-calibration procedure for electrostatic accelerators, H. H. Andersen, P. Hornshøj, L. Højsholt-Poulsen, H. Knudsen, B. R. Nielsen and R. Stensgaard 136 (1976) 119
ffects of "partial" equalization in cycling-scale AD converters, A. Ferrandini, E. Lo Nigro, D. Marino and N. Mirizzi 136 (1976) 125
^{252}Cf-based hydrogen analyzer, D. A. Close, R. C. Bearse and H. O. Menlove 136 (1976) 131
Methods of determining the recoilless absorption probability of Mössbauer radiation. Part I – Use of conventional detectors, B. Manouchev, Ts. Bonchev and D. Ivanov 136 (1976) 261
Methods of determining the recoilless absorption probability of Mössbauer radiation. Part II – Use of a resonance detector, B. Manouchev, Ts. Bonchev, D. Ivanov and N. Condeva 136 (1976) 267
A high rate gamma spectroscopy system for activation analysis of short-lived isomeric transitions, G. P. Westphal . 136 (1976) 271
Automation of energy measurements in the 634 MeV proton beam from the Dubna synchrocyclotron by the achromatic Cherenkov method, V. P. Zrelov, V. P. Lupiltsev, P. Luptak, M. F. Shabashov and R. Janik . . . 136 (1976) 285
A method to reveal depth distributions of carbon, oxygen and nitrogen in metal surfaces by means of neutron spectrometry, J. Lorenzen 136 (1976) 289
Pivoting light guides (*Letter to the Editor*), T. Bressani, E. Chiavassa, G. Dellacasa, M. Gallio, A. Musso and M. Panighini 136 (1976) 401
New method for the measurement of angular distributions of cross sections and polarizations, R. J. Slobodrian, B. Frois, J. Birchall and R. Roy 136 (1976) 525
A Ge(Li) spectrometer with improved overload recovery performance, J. Uyttenhove and J. Demuynck 136 (1976) 529
Contrast enhancement of etched particle tracks in muscovite mica. G. P. Dixon and J. G. Williams 136 (1976) 537
Amplitude and rise time compensated timing optimized for large semiconductor detectors, J. J. Kozyczkowski and J. Bialkowski 137 (1976) 75
Calibration of neutron detectors for time-of-flight experiments by making use of a borated graphite standard neutron spectrum pile, I. Kimura, K. Kobayashi, S. A. Hayashi, S. Yamamoto, M. Ando, S. Kanazawa, H. Nishihara and Y. Higashihara 137 (1976) 85
A mobile helium-jet transport system for on-line spectroscopy of short-range spallation products, H. Jungclas, H. G. Wilhelm, W. Westmeier, W. Kornahl, Y. Fares, D. Molzahn, R. Brandt and H. Wollnik 137 (1976) 93
Possibility of a highly monochromatic neutron polarizer, S. Funahashi 137 (1976) 99
The Jülich on-line separator for fission products "JOSEF", H. Lawin, J. Eidens, J. W. Borgs, R. Fabbri, J. W. Grüter, G. Joswig, T. A. Khan, W. D. Lauppe, G. Sadler, H. A. Selič, M. Shaanan, K. Sistemich and P. Armbruster 137 (1976) 103
An external beam technique for proton-induced X-ray emission analysis, A. Katsanos, A. Xenoulis, A. Hadjiantoniou and R. W. Fink 137 (1976) 119
Energy range extension for an electrostatic-analyzer homogenizer system, D. S. Flynn, E. G. Bilpuch, F. O. Purser, H. W. Newson, L. W. Seagondollar and G. E. Mitchell 137 (1976) 125
Selective transmission window of Li II for photons, to pump an X-ray laser, P. L. Csonka 137 (1976) 131
Absolute determination of trace quantities of the ^{226}Ra series by time interval analysis, P. Cross and G. W. McBeth . 137 (1976) 135
Nouveau détecteur de localisation. Le dispositif à « jeu de jacquet », R. Allemand et G. Thomas 137 (1976) 141
Graded-Z flash-bremsstrahlung depth-dose spectrometer, V. V. Verbinski, J. C. Young and F. J. Sazama 137 (1976) 243
High resolution depth profiling of oxygen and carbon in materials by spectral deconvolution, R. L. Schulte 137 (1976) 251
A TV camera system for digitizing single shot oscillograms at a sweep rate of 0.1 ns/cm, M. Kienlen, G. Knispel, J. A. Miehe and B. Sipp 137 (1976) 257

Energy resolution improvement in scattering experiments using highly divergent accelerator beams, W. R. Falk, O. Abou-Zeid and L. Ph. Roesch . . . 137 (1976) 261
Theory of electron re-emission Mössbauer spectroscopy, G. P. Huffman . . . 137 (1976) 267
A digital technique for neutron-gamma pulse shape discrimination *(Letter to the Editor)*, C. L. Morris, J. E. Bolger, G. W. Hoffmann, C. F. Moore, L. E. Smith and H. A. Thiessen . . . 137 (1976) 397
Walk-free fast timing for a heavy-ion time-of-flight telescope *(Letter to the Editor)*, N. E. Sanderson, B. R. Fulton and J. B. A. England . . . 137 (1976) 399
A deuteron tensor polarimeter using the $^{3}He(d,p)^{4}He$ reaction, R. P. Goddard, N. Rohrig, L. D. Knutson and W. Haeberli . . . 137 (1976) 451
The production of ^{11}C by the interaction of 375 MeV/amu Ne^{10+} ions with carbon, A. R. Smith and R. H. Thomas . 137 (1976) 459
D1A, a high resolution neutron powder diffractometer with a bank of mylar collimators, A. W. Hewat and I. Bailey. 137 (1976) 463
Analytical application of particle induced X-ray emission, S. A. E. Johansson and T. B. Johansson . . . 137 (1976) 473
Measurement of cosmic ray neutron spectrum at sea level, A. O. Sanni . . . 137 (1976) 517
Automatic analysis of gamma-ray spectra from germanium detectors, G. W. Phillips and K. W. Marlow . . . 137 (1976) 525
Higher harmonics influence in neutron Fourier TOF spectroscopy *(Letter to the Editor)*, P. Ziegler, G. Badurek and G. P. Westphal . . . 137 (1976) 595
Green light emitting diodes simulate nuclear events, R. Ernwein and Ph. Gorodetzky . . . 138 (1976) 57
Développement, auprès de l'accélérateur ALICE, des méthodes de transport par jet d'hélium des produits de réactions nucléaires. Description et applications, C. Deprun, H. Gauvin et Y. le Beyec . . . 138 (1976) 111
Filtered reactor beams for fast neutron capture γ-ray experiments, R. C. Greenwood and R. E. Chrien . . . 138 (1976) 125
An efficient alignment procedure for large photomultiplier arrays, P. D. Carter and A. G. Wright . . . 138 (1976) 145
Ionization of a polarized deuterium beam in a Penning discharge *(Letter to the Editor)*, A. Kruger, H.-G. Mathews, S. Penselin and A. Weinig . . . 138 (1976) 201
The pulse separation spectrum for the detection of neutrons from a mixture of fissions and single-neutron events, C. H. Vincent . . . 138 (1976) 261
Experimental parameters for quantitative surface analysis by medium energy ion scattering, W. C. Turkenburg, H. H. Kersten, B. G. Colenbrander, A. P. De Jongh and F. W. Saris . . . 138 (1976) 271
A simple model for the prediction of gamma-ray pulse-height spectra for right-circular cylindrical sodium iodide crystal detectors, R. P. Gardner . . . 138 (1976) 287
A new type of double-compensated calorimeter for absolute beam intensity measurements, Ch. Thomann and J. E. Benn . . . 138 (1976) 293
Suppressing background and increasing luminosity of a β-spectrometer of internal target type for an investigation of the (n,e) reaction, K. S. Akhnazarov, B. A. Emelianov, D. M. Kaminker, Yu. L. Khazov and S. L. Sakharov 138 (1976) 299
Calibration of thermoluminescent dosimeters for low exposure rates, P. C. Hsu and P. S. Weng . . . 138 (1976) 307
On the optical contrast of particle tracks in nuclear track detectors, Stef. Charalambous and M. Zamani . . . 138 (1976) 311
Separation of coherent and spin-incoherent neutron scattering by polarization analysis, J. C. Dore, J. H. Clarke and J. T. Wenzel . . . 138 (1976) 317
A new method of absolute neutron flux determination using an associated gamma-ray technique, J. D. Brandenberger, F. D. Snyder, J. D. Dawson, T. W. Burrows and F. D. McDaniel . . . 138 (1976) 321
Target thickness uniformity gauge, R. Liljestrand, G. Blanpied, G. W. Hoffmann, J. E. Spencer and J. R. Rhodes 138 (1976) 471
Problems related to the use of annihilation radiation for precision energy calibration of Ge(Li) detectors, K. Fransson, A. Nilsson, J. de Raedt and K.-G. Rensfelt . . . 138 (1976) 479
Kinematical analysis of the data from three-particle reactions by statistical methods, J. Krug and U. Nocken . . 138 (1976) 489
Conversion electron Mössbauer spectroscopy at low temperatures *(Letter to the Editor)*, J. A. Sawicki, B. D. Sawicka and J. Stanek . . . 138 (1976) 565
Metal defect studies by positron annihilation spectroscopy using an electron linac, C. W. Schulte, J. L. Campbell and R. R. Gingerich . . . 138 (1976) 647
Lead–bismuth radiography, D. S. Woolum, D. S. Burnett and L. S. August . . . 138 (1976) 655
A pulse stacking method of particle counting applied to position sensitive detection, E. Basilier . . . 138 (1976) 663
A simple matrix isolation system for Mössbauer spectroscopy, M. Pasternak and S. Shamai . . . 138 (1976) 673
Detection of Mössbauer γ-rays from ^{73}Ge and ^{181}Ta, L. Pfeiffer . . . 140 (1977) 57
A multiwire proportional chamber system with digital read-out for the Munich Q3D-spectrograph, P. Glässel . . . 140 (1977) 61
A new method for studying the nuclear and electronic mechanisms of heavy ion stopping in matter, I. Kh. Lemberg and A. A. Pasternack . . . 140 (1977) 71
Compact single-line Mössbauer sources of cobaltous oxide, C.-J. Song and J. G. Mullen . . . 140 (1977) 81
A polarization standard for protons between 6 and 8 MeV, H. O. Meyer, T. P. Cleary and W. Haeberli . . . 140 (1977) 83
Computation of the efficiency distribution of a multichannel focusing collimator, A. Balasubramanian and T. V. Venkateswaran . . . 140 (1977) 89
Gas quality test in the proportional counter, J. Planinić . . . 140 (1977) 93
Multielementanalysen durch Neutronenaktivierung von kurzlebigen Kernzuständen, F. Grass und G. P. Westphal . 140 (1977) 97
Detection of fast neutron contamination in photon beams, Z. Berant, A. Wolf and R. Moreh . . . 140 (1977) 109
Ion beam studies- Part III(b). The experimental evaluation and application of electrostatic mirrors for the manipulation and focussing of heavy ions, D. G. Beanland, J. H. Freeman, D. J. Chivers and G. A. Gard . . . 140 (1977) 113

lographic discharge chamber, V. S. Kozlov, M. V. Stabnikov, V. I. Tarakanov and M. A. Tombak **140** (1977) 125
oduction of DT neutrons by means of TiT targets and analyzed atomic deuteron beams *(Letter to the Editor)*, G. Stengl and H. Vonach **140** (1977) 197
in target thickness measurement by photon induced X-ray fluorescence *(Letter to the Editor)*, T. Paradellis . . . **140** (1977) 205
e improvement of the spatial resolution of a xenon-filled X-ray imaging MWPC by means of pulse height selection *(Letter to the Editor)*, J. E. Bateman **140** (1977) 211
avy ion timing with channel-plates, J. Girard and M. Bolore **140** (1977) 279
generalized method for correcting pulse-height spectra for the peak pile-up effect due to double sum pulses. Part I. Predicting spectral distortion for arbitrary pulse shapes. R. P. Gardner and L. Wielopolski **140** (1977) 289
generalized method for correcting pulse-height spectra for the peak pile-up effect due to double sum pulses. Part II. The inverse calculation for obtaining true from observed spectra, L. Wielopolski and R. P. Gardner **140** (1977) 297
tection and measurement of the depth distribution of light elements in materials with a ^{6}Li beam, J. L'Ecuyer, C. Brassard, C. Cardinal, L. Deschênes, Y. Jutras and J. P. Labrie **140** (1977) 305
ata on rotating plasma operation in Tornado traps, B. Lehnert **140** (1977) 315
spiral ion exchanger for rapid radiochemical separations, P. Puumalainen and H. Venäläinen **140** (1977) 333
mitations of the pulser method for pile-up corrections in Ge(Li)-spectrometry, K. Debertin and U. Schötzig . . . **140** (1977) 337
system for channeling experiments, R. Hellborg, K. Håkansson, M. Lindén and G. Skog **140** (1977) 341
nciples for an optimal demagnetization and application to the high-resolution beta spectrometer "BILL", P. Jeuch and W. Mampe **140** (1977) 347
clear spectroscopy of fission products with a He-jet time-of-flight mass spectrometer, K. Wien, F. Faß, E. Kasseckert, E. Koglin, R. Münzel, D. Schardt and H. Wollnik **140** (1977) 359
st neutron flux measurement and spectroscopy using silicon semiconductor detectors, S. Dési. **140** (1977) 467
lf-triggering detectors for recoil nuclei, A. S. Alexanian, T. L. Asatiani, M. I. Dayon, A. O. Gasparian, L. A. Jirova, V. A. Ivanov, A. D. Kamenski, F. F. Kayumov, G. K. Megrabian, G. G. Mkrtchian and R. N. Pikhtelev **140** (1977) 473
creasing a spectrometer's solid angle without loss of resolution, R. M. DeVries ,D. Shapira and M. R. Clover . . **140** (1977) 479
multicrystal detection system for localization and measurement of photon emitters without external collimation, G. R. Laurer and M. Eisenbud **140** (1977) 481
ase space acceptance and emittance in beam transport with application to tandem accelerators, J. D. Larson and C. M. Jones **140** (1977) 489
rticle detection by means of controllable secondary electron emission method, M. P. Lorikyan and N. N. Trofimchuk **140** (1977) 505
he digitization of streamer chamber tracks using a standard 625 line T.V. camera *(Letter to the Editor)*, D. J. Martin, A. M. MacLeod, K. M. Smith and M. D. Rousseau **140** (1977) 583

umerical and Data Analysis

etermination of detector efficiencies for gamma ray energies up to 12 MeV. II. Monte Carlo calculation, B. Grosswendt and E. Waibel **131** (1975) 143
leasurement of coherent scattering cross-sections of gamma rays at very low momentum transfer, S. C. Roy, A. Nath and A. M. Ghose **131** (1975) 163
Monte Carlo calculation of high energy hadronic cascade in matter, A. Grant. **131** (1975) 167
ptimality of binary sequences for correlation choppers, Andrzej Graffstein **131** (1975) 173
cintillation in Pilot 425 and UVT Lucite, Peter H. Garbincius **131** (1975) 273
he fringing fields of a spherical electrostatic spectrometer, and their influence on the aberration coefficients, A. Sköllermo and B. Wannberg **131** (1975) 279
amma-ray buildup factors for finite cylindrical media, Ezra Elias, Yitzhak Segal and Amos Notea **131** (1975) 307
adioactive neutron source spectra from ^{9}Be (α,n) cross section data, K. W. Geiger and L. Van der Zwan **131** (1975) 315
utomatic use of POLLY III ionization data for the analysis of bubble chamber pictures, Claude N. Kennedy, Brian J. Deery and Anthony W. Key **131** (1975) 331
Multiple scattering of keV ions: Lateral distributions in argon and nitrogen (*Letter to the Editor*), G. Sidenius and N. Andersen. **131** (1975) 387
recise energy determination of the first excited state in ^{137}Cs for absolute energy calibration in muonic atoms, K. Fransson, A. Nilsson, J. De Raedt and L. Tauscher **131** (1975) 511
ntensity measurements of the γ-ray decay of ^{28}Si via the ^{27}Al (p, γ) ^{28}Si E_p = 992 keV resonance, H. L. Scott and T. F. Lusby **131** (1975) 517
Monte Carlo calculation of peak efficiencies and response functions of coaxial-type Ge(Li) detectors for disk gamma-ray sources, Takashi Nakamura **131** (1975) 521
Monte Carlo calculation of energy response functions for a lithium glass scintillator for neutrons between 1 and 6 MeV, D. R. Weaver **131** (1975) 529
onvergence in multiple neutron scattering correction in plate geometry targets (*Letter to the Editor*), Raymond A. Zuhr and K. Min **131** (1975) 573

The Barkas effect – or Z_1^3, Z_1^4 – corrections to stopping of swift charged particles, J. Lindhard 132 (1976) 1
An ion-implantation method to measure the fraction of beam carrying inner-shell vacancies when penetrating solids, K.-H. Schartner, P. Woerlee, Th. P. Hoogkamer and F. W. Saris 132 (1976) 35
Characteristic K X-ray production in heavy ion-atom collisions in solids, W. N. Lennard and I. V. Mitchell . . 132 (1976) 39
Energy loss of atomic and molecular ion beams in thin foils, J. W. Tape, W. M. Gibson, J. Remillieux, R. Laubert and H. E. Wegner 132 (1976) 75
Stopping powers from the inverted Doppler shift attenuation method: Z-oscillations; Bragg's rule or chemical effects; solid and liquid state effects, W. Pietsch, U. Hauser and W. Neuwirth 132 (1976) 79
The velocity dependence of the stopping power of channeled iodine ions from 0.6 to 60 MeV, C. D. Moak, B. R. Appleton, J. A. Biggerstaff, M. D. Brown, S. Datz, T. S. Noggle and H. Verbeek 132 (1976) 95
Energy loss of channelled protons in Al single crystal, K. G. Prasad and R. P. Sharma 132 (1976) 103
Measurements of the stopping cross sections for protons and ^{4}He ions in erbium and erbium oxide: A test of Bragg's rule, R. A. Langley and R. S. Blewer 132 (1976) 109
Nuclear and electronic stopping powers of low energy ions with $Z \ll 10$ in silicon, H. Grahmann and S. Kalbitzer 132 (1976) 119
Energy loss of α-particles channelled in metal-hydrogen systems, A. P. Pathak 132 (1976) 125
Energy straggling of heavy ions ($A \approx 100$, $E/A \approx 1$ MeV/amu) in solids and gases, the limiting factor of the charge resolving power of energy-loss detectors, P. Armbruster, K. Sistemich, J. P. Boquet, Ch. Chauvin and Y. Glaize 132 (1976) 129
Atomic stopping-power problems encountered in measurements of nuclear γ-ray lifetimes by the Doppler-Shift-Attenuation method, B. M. Latta and P. J. Scanlon 132 (1976) 133
Channeling of GeV/c protons and pions, O. Fich, J. A. Golovchenko, K. O. Nielsen, E. Uggerhøj, C. Vråst-Thomsen, G. Charpak, S. Majewski, F. Sauli and J. P. Ponpon 132 (1976) 137
Energy loss of fast channeled particles, J. A. Golovchenko and H. Esbensen 132 (1976) 137
Transmission and small-angle-scattering of 15 MeV electrons in silicon single crystals, U. Schiebel, A. Neufert and G. Clausnitzer 132 (1976) 139
Dechanneling theory with the Fokker-Planck equation and a modified diffusion coefficient, Y. H. Ohtsuki, M. Kitagawa, T. Waho and T. Omura 132 (1976) 149
Feeding-in and blocking processes of MeV protons transmitted through silicon single crystals, G. Della Mea, A. V. Drigo, S. Lo Russo, P. Mazzoldi, G. G. Bentini, S. U. Campisano, G. Foti and E. Rimini 132 (1976) 161
Temperature dependence of planar channeling in transmission experiments, S. U. Campisano, G. Foti, E. Rimini, G. Della Mea, A. V. Drigo, S. Lo Russo, P. Mazzoldi and G. G. Bentini 132 (1976) 169
Channeling dips for outer-shell X-ray yields, J. U. Andersen and J. A. Davies 132 (1976) 179
Correlation of predicted and measured GaAs and Ge X-ray yields as a function of crystal orientation, P. B. Price and L. L. Gadeken 132 (1976) 191
Study of the structure of axial and planar aligned backscattering spectra in vanadium, F. Abel, M. Bruneaux, C. Cohen, C. Della Mea, A. V. Drigo, S. Lo Russo and P. Mazzoldi 132 (1976) 197
Sputtering and dynamic interstitial motion in alkali halides, N. Itoh 132 (1976) 201
Channeling studies of radiation damage in sodium chloride crystals, C. S. Newton, R. B. Alexander, G. J. Clark, H. J. Hay and P. B. Treacy 132 (1976) 213
Ionisation induced defects in alkali halide single crystals, A. Perez, J. Davenas and C. H. S. Dupuy 132 (1976) 219
Sputtering of potassium chloride by H, He, and Ar ions, J. P. Biersack and E. Santner 132 (1976) 229
Radial distribution of ion-induced defects determined by channeling measurements, P. Baeri, S. U. Campisano, C. Ciavola, G. Foti and E. Rimini 132 (1976) 237
The combined effects of lattice vibrations and irradiation-produced defects on dechanneling, L. M. Howe, M. L. Swanson and A. F. Quenneville 132 (1976) 241
Dechanneling measurements of defect depth profiles and effective cross-channel distribution of misaligned atoms in ion-irradiated gold, P. P. Pronko 132 (1976) 249
Comparison of measured and calculated damage distributions for light keV ion bombardment of solid surfaces, D. A. Thompson and J. E. Robinson 132 (1976) 261
Non-linear dependence on density of elastic stopping power, J. B. Sanders and H. E. Roosendaal 132 (1976) 267
Energy loss and straggling of heavy ions by nuclear interactions in silicon, A. Grob, J. J. Grob and P. Siffert . . 132 (1976) 273
Low energy ion induced damage in silicon at 50 K, D. A. Thompson and R. S. Walker 132 (1976) 281
Damage production and arsenic displacement in silicon by proton and helium irradiation, W. H. Kool, H. E. Roosendaal, L. W. Wiggers and F. W. Saris 132 (1976) 285
Neutron sputtering, R. Behrisch 132 (1976) 293
The energy dependence of gold selfsputtering, H. L. Bay, H. H. Andersen, W. O. Hofer and O. Nielsen 132 (1976) 301
Experiments on transmission sputtering with 100–300 keV noble gas ions on metal films, P. Mertens 132 (1976) 307
Transmission sputtering by high-energy heavy ions, A. D. Marwick 132 (1976) 313
The effect of surface recoils on the energy distribution of sputtered gold, I. Reid, B. W. Farmery and M. W. Thompson 132 (1976) 317
Secondary ion emission from polycrystalline molybdenum. Energy and angular distributions, G. A. v. d. Schootbrugge, A. G. J. de Wit and J. M. Fluit 132 (1976) 321
Energy distributions of neutral atoms and molecules sputtered from polycrystalline silver, F. Bernhardt, H. Oechsner and E. Stumpe 132 (1976) 329

n the role of recoil implantation in altering the stoichiometry of a bombarded solid, R. Kelly and J. B. Sanders . . 132 (1976) 335
he sputtering of PtSi and NiSi, J. M. Poate, W. L. Brown, W. M. Augustyniak, J. W. Mayer, K. N. Tu and W. F. Van der Weg . . . 132 (1976) 345
puttering of the alloy systems Ag-Au, Au-Cu and Ag-Cu studied by Auger electron spectroscopy, W. Färber, G. Betz and P. Braun . . . 132 (1976) 351
ngular distribution measurements of sputtered atoms with characteristic X-ray emission, K. Rödelsperger and A. Scharmann . . . 132 (1976) 355
puttering of ErD_2: Experiment and theory, E. P. Eernisse and D. K. Brice . . . 132 (1976) 363
puttering in the high voltage electron microscope, D. Cherns, F. J. Minter and R. S. Nelson . . . 132 (1976) 369
n the emission of secondary electrons from solid deuterium, H. Sørensen . . . 132 (1976) 377
urrent density effects in secondary ion emission studies, K. Wittmaack . . . 132 (1976) 381
he influence of sputtering, range shortening and stress-induced outdiffusion on the retention of xenon implanted in silicon, P. Blank, K. Wittmaack and F. Schulz . . . 132 (1976) 387
he surface microtopography induced by ion bombardment on Cu single crystals, L. Tanović and B. Perović . . 132 (1976) 393
ptical excitation during ion bomdardment of copper under channeling conditions, W. F. Van der Weg, N. H. Tolk, C. W. White and J. M. Kraus . . . 132 (1976) 405
noluminescence of aluminum, M. Zivitz and E. W. Thomas . . . 132 (1976) 411
n the continuous spectrum emitted by particles ejected from the surface of solid targets by an ion beam, T. S. Kiyan, V. V. Gritsyna and Ya. M. Fogel' . . . 132 (1976) 415
ontinuum optical radiation produced by low-energy heavy particle bombardment of metal targets, C. W. White, N. H. Tolk, J. Kraus and W. F. Van der Weg . . . 132 (1976) 419
ontinuum photon emission by some metals under heavy ion bombardment, C. B. Kerkdijk, K. H. Schartner, R. Kelly and F. W. Saris . . . 132 (1976) 427
n the spectrum emitted by excited particles ejected from the surface of a calcium target by a beam of Ar^+ ions, T. S. Kijan, V. V. Gritsyna and Ya. M. Fogel' . . . 132 (1976) 435
ine shape measurements of atoms sputtered from polycrystalline Cu, Zn and Al by 300 keV Ar^+ bombardment, R. Hippler, W. Krüger, A. Scharmann and K.-H. Schartner . . . 132 (1976) 439
xcited state formation as a function of initial energy of H^+ and He^+ ions scattered from metal surfaces, W. E. Baird, M. Zivitz and E. W. Thomas . . . 132 (1976) 445
he effect of adsorption of Cs and coadsorption of Cs and O_2 on bombardment-induced light emission from Cu and Al surfaces, G. E. Thomas and E. E. de Kluizenaar . . . 132 (1976) 449
urface resonance ionization; total ionization cross-sections of alkali atoms impinging on a tungsten (110) surface, A. Hurkmans, E. G. Overbosch, K. Kodera and J. Los . . . 132 (1976) 453
nelastic collisions at ion bombarded surface. I. Studies in secondary ion and photon excitation, A. R. Bayly, P. J. Martin and R. J. MacDonald . . . 132 (1976) 459
An investigation of the mass spectra of secondary ions ejected from the single crystal surface of semiconductors, A. G. Koval', V. N. Mel'nikov and Yu. V. Enukov . . . 132 (1976) 467
The temperature and oxygen pressure influence on the iron secondary ion emission, A. G. Koval', V. V. Bobkov and Yu. A. Klimovskii . . . 132 (1976) 473
Electronic emission from solid targets bombarded by noble gas ions (10–100 keV): energetic and spatial distributions, N. Benazeth, J. Agusti, C. Benazeth, J. Mischler and L. Viel . . . 132 (1976) 477
Energy spectra of secondary electrons emitted from metal surfaces under bombardment with high energy noble gas ions, W. Krüger, A. Scharmann and N. Stiller . . . 132 (1976) 483
Measurements of impact-parameter dependent cross sections of continuum X-rays, H. Schmidt-Böcking, I. Tserruya, R. Schulé, R. Schuch and K. Bethge . . . 132 (1976) 489
Non-characteristic X-rays from heavy-ion collisions in gaseous and solid targets, F. Bell and H.-D. Betz . . . 132 (1976) 493
Non-characteristic X-ray emission in Ne-Al collisions, K. O. Groeneveld, B. Kolb, J. Schader and K. D. Sevier . . 132 (1976) 497
Bremsstrahlung induced by proton and helium-3 ion impact, H. Tawara, K. Ishii and S. Morita . . . 132 (1976) 503
Z_1 scaling for impact-parameter dependence of inner-shell ionization by heavy ions, J. U. Andersen, E. Laegsgaard, M. Lund and C. D. Moak . . . 132 (1976) 507
X-ray emission from boron and boron nitride by bombardment with nitrogen and argon ions, K. Ozawa, K. Kawatsura, F. Fujimoto and M. Terasawa . . . 132 (1976) 517
Radiative electron capture by highly stripped ions in single crystal channels, B. R. Appleton, J. A. Biggerstaff, T. S. Noggle, R. M. Ritchie, S. Datz, D. C. Moak and H. Verbeek . . . 132 (1976) 521
Investigation of electron spin polarization in ferromagnets, R. Sizmann . . . 132 (1976) 523
Low energy ion scattering: Elastic and inelastic effects, W. Heiland and E. Taglauer . . . 132 (1976) 535
Neutral fraction in proton beams after channeling through thin crystals, M. J. Gaillard, J.-C. Poizat, J. Remillieux, A. Chateau-Thierry, A. Gladieux and W. Brandt . . . 132 (1976) 547
Experimental neutral charge fractions in proton beams emerging from solids, A. Chateau-Thierry, A. Gladieux and B. Delaunay . . . 132 (1976) 553
Neutralisation behavior in scattering of low energy ions from solid surfaces, H. H. Brongersma and T. M. Buck . 132 (1976) 559
Charge exchange of low energy He ions and atoms scattered from a copper single crystal, L. K. Verhey, B. Poelsema and A. L. Boers . . . 132 (1976) 565

Energy distributions and charge state fractions of hydrogen backscattered from a gold surface, W. Eckstein and P. Matschke . . . 132 (1976) 57
Energy spectra of neutral and ionized Ne scattered from Au targets, W. F. Van der Weg, T. M. Buck and G. M. Wheatley . . . 132 (1976) 57
Backscattering of neutralised Ar-ions from a Cu(110) surface, A. Van Veen and J. M. Fluit . . . 132 (1976) 57
Ion implantation effects in space, M. Maurette . . . 132 (1976) 57
Surface structure analysis by means of Rutherford scattering: methods to study surface relaxation, W. C. Turkenburg, W. Soszka, F. W. Saris, H. H. Kersten and B. G. Colenbrander . . . 132 (1976) 58
Theoretical considerations underlying the measurement of surface relaxations by ion scattering, D. P. Jackson . . 132 (1976) 60
Surface relaxation effects in (111) platinum measured by backscattering and channeling, J. A. Davies, D. P. Jackson, J. B. Mitchell, P. R. Norton and R. L. Tapping . . . 132 (1976) 60
Crystalline transparency and anisotropy effects on backscattered noble gas ions, M. Bernheim and G. Slodzian . 132 (1976) 61
Determination of the surface Debye temperature using quasi-triple collisions in low energy ion scattering, B. Poelsema, L. K. Verhey and A. L. Boers . . . 132 (1976) 62
Surface channeling, R. Sizmann and C. Varelas . . . 132 (1976) 63
Scattering, energy loss and X-ray production of protons of 150–275 keV at grazing incidence on a tungsten crystal, G. S. Harbinson, B. W. Farmery, H. J. Pabst and M. W. Thompson . . . 132 (1976) 63
Computer studies of low energy scattering in crystalline and amorphous targets, M. Hou and M. T. Robinson . . 132 (1976) 64
Computer studies of the reflection of light ions from solids, O. S. Oen and M. T. Robinson . . . 132 (1976) 64
Multiple scattering of low energy rare gas ions: A comparison of experiment and computer simulation, W. Heiland, E. Taglauer and M. T. Robinson . . . 132 (1976) 65
Calculations of the moments of the range and damage distributions for low keV light ion bombardment of amorphous solids, U. Littmark, G. Maderlechner, R. Behrisch, B. M. U. Scherzer and M. T. Robinson . . . 132 (1976) 66
Scattering of light keV ions from amorphous and crystalline solid surfaces, J. E. Robinson, K. K. Kwok and D. A. Thompson . . . 132 (1976) 66
Total backscattering of protons from metal surfaces, G. Sidenius and T. Lenskjær . . . 132 (1976) 67
Backscattering, trapping and postbomdardment thermal release of 100 eV to 2 keV D_2^+ ions at a Mo surface, C. Braganza, G. Carter and G. Farrell . . . 132 (1976) 67
Backscattering of neutralized noble gas ions from polycrystalline surfaces at bombarding energies below 1 keV, W. R. Gesang, H. Oechsner and H. Schoof . . . 132 (1976) 68
Small-angle multiple particle scattering in the inverse-square interaction potential approximation, O. B. Firsov, E. S. Mashkova, V. A. Molchanov and V. A. Snisar . . . 132 (1976) 69
Lateral distributions of multiply scattered ions: Sensitivity to atomic interaction, Z_1-oscillations, molecular effects, double-differential distributions, and implications for surface scattering, N. Andersen, P. Sigmund, J. Heinemeier, P. Hvelplund, H. Knudsen and G. Sidenius . . . 132 (1976) 70
length, C. Özmutlu and A. Z. Ortaovali . . . 133 (1976) 14
Stripping of 1.04 MeV per nucleon krypton ions in high molecular weight vapours, D. A. Eastham, T. Joy, R. B. Clark and R. King . . . 133 (1976) 15
Energy resolution and nuclear charge resolving power of an ionisation chamber for fission products, K. Sistemich, P. Armbruster, J. P. Bocquet, Ch. Chauvin and Y. Glaize . . . 133 (1976) 16
A measure of the degree of fit between the calculated and observed spectra, T. Sekine and H. Baba . . . 133 (1976) 17
Relevance of the feature "Cluster Number" in a non-parametric method for the automatic selection of high energy gamma-ray events in spark chambers (*Letter to the Editor*), R. Buccheri, V. Di Gesù and S. Salemi . . . 133 (1976) 17
Shape deformation of a light flash through a light pipe (*Letter to the Editor*), F. Calligaris, P. Ciuti, I. Gabrielli and R. Giacomich . . . 133 (1976) 18
Prediction of the pulse-height spectral distortion caused by the peak pile-up effect, L. Wielopolski and R. P. Gardner 133 (1976) 30
The response of plastic scintillator to stopping protons in the energy range 70 to 100 MeV, B. M. Preedom, M. J. Saltmarsh, C. A. Ludemann and J. Alster . . . 133 (1976) 31
The ionisation loss of relativistic charged particles in thin gas samples and its use for particle identification. I. Theoretical predictions, J. H. Cobb, W. W. M. Allison and J. N. Bunch . . . 133 (1976) 31
The ionisation loss of relativistic charged particles in thin gas samples and it use for particle identification. II. Experimental results, W. W. M. Allison, C. B. Brooks, J. N. Bunch, R. W. Pleming and R. K. Yamamoto . . . 133 (1976) 32
A simple method for generation of background-free gamma-ray spectra, Y. Kawarasaki . . . 133 (1976) 33
Investigation of the jitter of the constant fraction timing method based on the comparison of the original signal and the stretched and attenuated one, J. Gál . . . 133 (1976) 34
Experiments on the velocity distribution of a rotating plasma, J. Bergström and T. Hellsten . . . 133 (1976) 34
Measurement of spatial distribution of bremsstrahlung in aluminum and iron slabs bombarded by 22 MeV electrons with activation detectors, H. Hirayama and T. Nakamura . . . 133 (1976) 35
An iterative method for absorber thickness corrections in Mössbauer experiments (*Letter to the Editor*), G. Dehe, B. Seidel and W. Meisel . . . 133 (1976) 38
Stepwise statistical method to analyse gamma-ray spectrum (*Letter to the Editor*), N. S. Singhal, B. M. Saraswat and R. G. Mendiratta . . . 133 (1976) 38

otoconductivity of irradiated LiF (*Letter to the Editor*), W. E. Nelson, J. F. Merklin and R. S. Lee **133** (1976) 387
ometric mean computer and its use with transition radiation experiments, V. Radeka, L. C. Rogers, L. C. L. Yuan, H. Uto and G. F. Dell **133** (1976) 525
liability of the weighting function for the pulse height weighting technique, N. Yamamuro, T. Hayase, T. Doi, Y. Fujita, K. Kobayashi and R. C. Block **133** (1976) 531
ect of a data buffer on the recorded distribution of time intervals for random events, J. C. Barton **133** (1976) 537
evision of the concept of registration threshold in plastic track detectors, G. Somogyi, K. Grabisch, R. Scherzer and W. Enge **134** (1976) 129
ecific luminescence studies of alpha particles in NE-102 scintillator film, M. L. Muga and J. D. Bridges . . . **134** (1976) 143
lowance for pile-up in the measurement of β-decay lifetimes, D. H. Wilkinson **134** (1976) 149
,n) threshold measurements for accelerator calibration and the problem of Q-value deductions, J. M. Freeman . **134** (1976) 153
nergy loss, energy straggling and angular straggling of heavy ions in carbon foils, K.-H. Schmidt, H. Wohlfarth, H.-G. Clerc, W. Lang, H. Schrader and K. E. Pferdekämper **134** (1976) 157
odel calculations of profiles and dose of high dose ion implants influenced by sputtering, H. Kräutle **134** (1976) 167
pectrometer for measuring total beta decay energies, E. Lund and G. Rudstam **134** (1976) 173
estimmung von J-129 neben J-125 und/oder J-131 in Lösungen mit Hilfe der hochauflösenden Gammaspektroskopie, G. Zaddach **134** (1976) 183
me dependence of the induced current in hemispherical semiconductor detectors (*Letter to the Editor*), C. Canali and H. L. Malm **134** (1976) 199
ne status of experiments at Fermi National Accelerator Laboratory, A. F. Greene and J. R. Sanford **134** (1976) 203
etermination of half-life, endpoint energy and shape factor in the decay of ^{27}Si and ^{24}Na with an on-line beta spectrometer, H. Genz, J. Reisberg, A. Richter, B. M. Schmitz, G. Schrieder, K. Werner and H. Behrens . . **134** (1976) 309
ime dependence of filtered resonance. Radiation of ^{57}Fe, N. Hayashi, T. Kinoshita, I. Sakamoto and B. Furubayashi **134** (1976) 317
ingle-ectron multiplication statistics as a combination of poissonian pulse height distributions using constraint regression methods, J.-P. Ballini, P. Cazes and P.-Y. Turpin **134** (1976) 319
model for the estimation of photon albedo based on single to total scattering ratio, E. Elias, A. Notea and Y. Segal **134** (1976) 331
amma-ray absorption coefficients for NaI(Tl), W. Mannhart and H. Vonach **134** (1976) 347
stimation of Fano factors in liquid argon, krypton, xenon and xenon-doped liquid argon, T. Doke, A. Hitachi, S. Kubota, A. Nakamoto and T. Takahashi **134** (1976) 353
nergy loss straggling of protons in thick absorbers, B. H. Armitage and P. N. Trehan **134** (1976) 359
amma emission cross sections for 23 elements using 3.29 MeV neutron inelastic scattering, F. I. Habbani and A. H. Jiggins **134** (1976) 545
Mesure de vies moyennes de niveaux excités par effet Doppler γ après émission α (cas du ^{223}Ra→^{219}Rn), C. F. Liang et A. Peghaire **134** (1976) 553
Delayed neutron spectrum from ^{87}Br created in thermal fission of ^{235}U, P. K. Ray and E. S. Kenney **134** (1976) 559
ntensity and spatial distribution of scattered ^{204}Tl beta particles, T. Dakubu **134** (1976) 565
imulation de la diffusion incohérente du rayonnement gamma par des électrons II (*Letter to the Editor*), O. Pingot **134** (1976) 595
Effect of molecular geometry on multiple scattering of heavy energetic particles (*Letter to the Editor*), G. Sidenius, N. Andersen, P. Sigmund, F. Besenbacher, J. Heinemeier, P. Hvelplund and H. Knudsen **134** (1976) 597
A data buffer for multi-parameter low-event rate applications (*Letter to the Editor*), D. E. Cumpstey and D. G. Vass **134** (1976) 601
Détermination par le calcul des coefficients d'attenuation des neutrons de 14 MeV, A. G. Elayi **135** (1976) 157
The energy losses of heavy ions, G. Varley, J. C. Willmott and F. Kearns **135** (1976) 167
Alpha-particle energy straggling in solids, R. B. Strittmatter and B. W. Wehring **135** (1976) 173
A study of bremsstrahlung spectra from the Lund 1 GeV electron synchrotron, G. Jarlskog, L. Jönsson and J. Palmer **135** (1976) 179
Efficiency and spatial resolution measurements of a modular neutron detector in the kinetic energy range 15–120 MeV, G. Betti, A. Del Guerra, A. Giazotto, M. A. Giorgi, A. Stefanini, D. R. Botterill, D. W. Braben, D. Clarke and P. R. Norton **135** (1976) 319
A compilation of n–p and n–C cross sections and their use in a Monte Carlo program to calculate the neutron detection efficiency in plastic scintillator in the energy range 1–300 MeV, A. Del Guerra **135** (1976) 337
Computer analysis of gamma and X-ray spectra, M. Hillman **135** (1976) 363
Migma distribution functions and fusion rates, M. M. Gordon and F. Marti **135** (1976) 369
$L_{\alpha,\beta,\gamma}$ X-ray intensities from the alpha decay of ^{238}Pu (*Letter to the Editor*), D. G. Vasilik and R. W. Martin . **135** (1976) 405
A method to identify nuclear reactions registered in ionographic detectors, M. Ortega, A. Vidal-Quadras, M. Tomás, V. Gandía and C. Jacquot **135** (1976) 519
On methods to determine the π^0 multiplicity distribution and its moments from the observed γ radiation, G. Ekspong and H. Johansson **135** (1976) 531
Double scattering in Compton profile measurements; an analytic approach, P. Paatero and V. Halonen **135** (1976) 537
The measurement of reaction thresholds using an escape suppressed Ge(Li) spectrometer (*Letter to the Editor*), J. F. Sharpey-Schafer, A. M. Al-Naser, A. H. Behbehani, L. L. Green, A. N. James, C. J. Lister and P. J. Nolan **135** (1976) 583
ncremental least squares and the approximate separation of exponentials, D. H. D. West **136** (1976) 137

Measurement of ultra-thin windows of ion implanted silicon detectors with low energy proton beams. H. GRAHMANN and S. KALBITZER 136 (1976) 14
The quantitative effect of electronic noise on the accuracy of timing signals from a detector, J. E. DRAPER 136 (1976) 15
Sub-nanosecond timing studies with plastic scintillation detectors, S. SANYAL, S. C. PANCHOLI and S. L. GUPTA . . 136 (1976) 15
Gas gain in multiwire proportional counters, J. PLANINIĆ 136 (1976) 16
Response of Pilot U scintillator to heavy ions, M. BUENERD, D. L. HENDRIE, U. JAHNKE, J. MAHONEY, A. MENCHACA-ROCHA, C. OLMER and D. K. SCOTT 136 (1976) 17
Multiple scattering of MeV gold and carbon ions in carbon and gold targets (*Letter to the Editor*), H. KNUDSEN and H. H. ANDERSEN 136 (1976) 19
Average added component of Cherenkov radiation due to knock-on electrons J. A. LEZNIAK 136 (1976) 29
A measurement of the efficiency for the detection of neutrons, in the momentum range 200–3200 MeV/c in large volume liquid scintillation counters, R. M. BROWN, A. G. CLARK, P. J. DUKE, W. M. EVANS, E. S. GROVES, R. J. OTT, H. R. RENSHALL, J. J. THRESHER, M. W. TYRRELL and T. B. WILLARD 136 (1976) 30
Search statistics of multiple scanning, J. S. AUSLÄNDER 136 (1976) 31
Precision energy measurement of γ rays from ^{15}N, ^{16}O, and ^{57}Fe, D. E. ALBURGER 136 (1976) 32
On the reconstruction of S-channel helicity amplitudes from a complete set of measurements, W. DE BOER and J. SOFFER 136 (1976) 33
Calibration source effects in Si(Li) detector efficiency determinations, S. J. CIPOLLA and M. J. HEWITT 136 (1976) 34
Stopping power measurements for ^{19}F, ^{24}Mg, ^{27}Al, ^{32}S and ^{35}Cl at energies ~0.2 to ~3.5 MeV/nucleon in Ti, Fe, Ni, Cu, Ag and Au, J. S. FORSTER, D. WARD, H. R. ANDREWS, G. C. BALL, G. J. COSTA, W. G. DAVIES and I. V. MITCHELL 136 (1976) 34
Experimental investigations of charge exchange processes in Lamb-shift sources with argon and krypton for production of D^--ions, V. BECHTOLD, L. FRIEDRICH and G. STRASSNER 136 (1976) 36
A compact fitting algorithm for accurate analysis of gamma spectra, M. KITAMURA, Y. TAKEDA, K. KAWASE and K. SUGIYAMA 136 (1976) 36
A study of effects of fitting functions on results of gamma ray peak analysis, Y. TAKEDA, M. KITAMURA, K. KAWASE and K. SUGIYAMA 136 (1976) 36
Restoration of photofission cross-sections from bremsstrahlung experiments, V. E. ZHUCHKO, YU. B. OSTAPENKO, A. S. SOLDATOV and YU. M. TSIPENYUK 136 (1976) 37
Investigation of certain parameters controlling the use of moderating detectors for neutron dosimetry, M. A. GOMAA and E. MOUSTAFA 136 (1976) 37
A precision energy measurement of the ^{125}I gamma line (*Letter to the Editor*), J. P. MILLER, F. BOEHM and H. E. HENRIKSON 136 (1976) 40
An empirical relation for the transmission coefficient of electrons under oblique incidence, T. TABATA and R. ITO . 136 (1976) 53
Validity of various semi-empirical formulae and analytical functions for the efficiency of Ge(Li) detectors, R. SINGH . 136 (1976) 54
The ionization-loss distribution at very small absorber thickness, V. A. CHECHIN and V. C. ERMILOVA 136 (1976) 55
^{3}He induced activation cross sections on ^{10}B, ^{16}O and ^{19}F, J. GASS and H. H. MÜLLER 136 (1976) 55
Comparaison des distributions statistiques de comptage des systèmes radioactifs, J. LIBERT 136 (1976) 56
Dependence of Mössbauer resonance intensities on vibrational lattice anisotropy in case of an axial electric field, G. K. SHENOY and J. M. FRIEDT 136 (1976) 56
Effects of neutron radiation on the electrical resistivity of copper at room temperature, B. MCGRATH, H. SCHÖNBACHER and M. VAN DE VOORDE 136 (1976) 57
Use of PROMs for CAMAC function decoding, J. C. BEECH 137 (1976)
The stopping power and straggling for alpha particles in tissue equivalent materials, M. J. GEARY and A. K. M. M. HAQUE 137 (1976) 15
A method for measuring the uniformity of thin targets by means of an alpha source and a Q3D-spectrograph, H. K. ABELE, P. GLÄSSEL, P. MAIER-KOMOR, H. J. SCHEERER, H. RÖSLER and H. VONACH 137 (1976) 15
Beam envelopes in particle spectrometers, H. WOLLNIK 137 (1976) 16
Algorithm for computer processing and analysis of gamma ray spectra for large-scale laboratory operations, B. A. ROSCOE and A. K. FURR 137 (1976) 17
Measurement of Lorentzian linewidths: Numerical evaluation of the Voigt integral, C. J. BATTY, S. D. HOATH and B. L. ROBERTS 137 (1976) 17
The efficiency of charge-exchange injection in proton accelerators and storage rings, A. K. KAMINSKY, R. A. MESHCHEROV and M. I. POPOVA 137 (1976) 18
Fitting function for the thermal neutron distribution in water due to a Ra-Be source (*Letter to the Editor*), M. FUJISHIRO, T. TABATA and J. FURUTA 137 (1976) 20
Effect of a sharp bend on the transmission of neutron guide tubes of circular cross section, W. MAYSENHÖLDER . . 137 (1976) 29
Multiple interaction processes in Ge(Li) detector pulse formation, R. CHUN, L. L. GADEKEN and B. C. ROBERTSON . . 137 (1976) 29
Coupling impedance structure above the tube cutoff frequency, M. MONTH and R. F. PEIERLS 137 (1976) 29
Aperture limitation due to random errors in superconducting magnets, M. MONTH and G. PARZEN 137 (1976) 31
Multicomponent profile refinement of time-of-flight neutron diffraction data, T. G. WORLTON, J. D. JORGENSEN, R. A. BEYERLEIN and D. L. DECKER 137 (1976) 33
Numerical calculation of the potential in a system of rotational symmetry. Part 1, A. SKÖLLERMO 137 (1976) 33

Numerical calculation of the potential in a system of rotational symmetry. Part 2, A. Sköllermo 137 (1976) 363
Collisions of He^+ ions with a Rb vapor target, R. J. Girnius and L. W. Anderson 137 (1976) 373
Organization of pulse-height analysis programs for high event rates *(Letter to the Editor)*, C. E. Cohn 137 (1976) 403
Study of the background characteristics by means of a high efficiency liquid scintillation counter, M. Alessio, L. Allegri, F. Bella and S. Improta 137 (1976) 537
Study of the characteristics of a cylindrical wall-less proportional counter, S. A. Saq'an and A. K. M. M. Haque . . 137 (1976) 545
Study of the sputtering process with Rutherford back-scattering, H. Kräutle 137 (1976) 553
Count rate effect on channel electron multiplier, C. Barat, J. L. Medale, J. Bouyssou and J. Coutelier 137 (1976) 559
Measurements of distributions of energy loss for 51, 102 and 153 keV protons in nine hydrocarbon gases, J. H. Thorngate 137 (1976) 569
Precision energy measurement of the ^{106}Ru 512 keV gamma ray compared with the positron annihilation radiation *(Letter to the Editor)*, K. Shizuma, H. Inoue and Y. Yoshizawa 137 (1976) 599
Track characteristics of low pressure spark chambers, D. Majumdar, K. Mazumder, J. P. Mundra and P. K. Sen Choudhury 138 (1976) 151
Damage effects and recovery in LiF:Mg, Ti thermoluminescent dosimeters after long-term annealing at 400 °C, E. Piesch, B. Burgkhardt and I. Hofmann 138 (1976) 157
Energy transfer to some TLD materials by neutrons; comparison of theoretical and experimental data, F. Spurný, R. Medioni and G. Portal 138 (1976) 165
Correction for the observed track-hole densities in the spark counting of fission tracks, A. M. Bhagwat, H. Singh and S. D. Soman 138 (1976) 173
Energy distribution functions of low energy ions in silicon absorbers measured for large relative energy losses, B. Wilken and T. A. Fritz 138 (1976) 331
A comprehensive formalism for the analysis of recoil-distance lifetimes, R. J. Sturm and M. W. Guidry 138 (1976) 345
Monte Carlo calculation of the electron energy loss spectrum for gamma rays incident on an organic scintillator, C. Chen, J. A. Lockwood and L. Hsieh 138 (1976) 363
Multiple coulomb scattering of heavy ions in emulsions *(Letter to the Editor)*, Y. V. Rao, K. Fukui and P. S. Young 138 (1976) 383
Detection efficiency and range determination of alpha particles in cellulose nitrate, A. Y. Qaqish and C. B. Besant 138 (1976) 493
An analysis of recoil distance measurements in the coincidence mode, W. M. Roney Jr. and W. A. Seale 138 (1976) 507
Measurements and calculations of cascades produced by 300 GeV protons incident on a target inside a magnet, M. Awschalom, S. Baker, C. Moore, A. van Ginneken, K. Goebel and J. Ranft 138 (1976) 521
Helium depth profiles in thin metal foils, L. Shabason and W. J. Choyke 138 (1976) 533
Study of multiple scattering effects in neutron-proton analysing power measurements, J. E. Brock, A. Chisholm, J. C. Duder and R. Garrett 138 (1976) 537
Measurement and evaluation of particle–γ angular correlations for the study of nuclear reaction mechanisms, W. Eyrich, A. Hofmann, U. Scheib, S. Schneider and F. Vogler 138 (1976) 543
Observations on pulse-height defect for helium ions of energies < 30 keV in silicon, K. C. Hsieh 138 (1976) 677
A CAMAC–CAMAC linkage module to interface between computers, N. Kajiura, I. Arai, T. Fujii, H. Ikeda, T. Kamae, S. Kawabata, K. Nakamura, K. Ogawa and H. Takeda 138 (1976) 681
Specification of a CAMAC single crate controller with DMA-option for PDP-11 computers, H. Barthel, W. Heep and J. G. Ottes 138 (1976) 691
The Poisson equation with the right-hand side $f(z)/\{1+[b(z)\cdot r]^2\}^{\frac{3}{2}}$ *(Letter to the Editor)*, A. Sköllermo 138 (1976) 715
Dual parameter list mode for X-ray analysis by crystal spectrometers *(Letter to the Editor)*, R. Hohm, G. Richter and B. Cleff 138 (1976) 717
Anergy correction of precise photonuclear resonances, N. Dytlewski, R. Koch and H. H. Thies 140 (1977) 123
Absolute determination of uranium concentration in rocks by gamma-ray spectroscopy, S. Mubarakmand, P. Chaudhry and F. I. Nagi 140 (1977) 133
Directional effects in track-etch imaging, W. J. Hartmann and A. A. Harms 140 (1977) 137
Auto-correlations with irregular signals, B. L. Chrisman 140 (1977) 145
Design and use of a data monitoring system for experiments with the CERN Omega spectrometer, B. Ghidini, A. Palano, K. Müller, L. Mandelli, F. Navach, V. Picciarelli, M. Edwards, I. L. Smith, D. N. Edwards, J. R. Fry and C. Pallazzi-Cerrina 140 (1977) 149
Large depth profile measurements of D, ^3He, and ^6Li by deuteron induced nuclear reactions, W. Möller, M. Hufschmidt and D. Kamke 140 (1977) 157
Parametric representation of X-ray detector efficiency curves, J. L. Campbell, H. H. Jorch and J. A. Thompson . . . 140 (1977) 167
Neutron spectra of ^{239}Pu–Be neutron sources, A. Kumar and P. S. Nagarajan 140 (1977) 175
On the charge state distribution of multiply charged ions extracted from electron beam ion sources, A. Müller, H. Klinger and E. Salzborn 140 (1977) 181
Pulse height defect of fission products in a silicon surface barrier detector, H. Wohlfarth, W. Land, H. Dann, H.-G. Clerc, K.-H. Schmidt, H. Schrader and the Lohengrin collaboration 140 (1977) 189
Stopping power of alpha particles in deuterium gas *(Letter to the Editor)*, W. Del Bianco and J. Richer 140 (1977) 215
The nature of the light produced inside a gas scintillation proportional counter, R. D. Andresen, E.-A. Leimann and A. Peacock 140 (1977) 371

Zeitliche verteilung der Dosisrate von Impulsen schneller Neutronen hinter Polyäthylen/Eisen-Schichten, H. Flegel, L. Hannappel und H. Schneider 140 (1977) 3
Note on the experimental determination of the relative fast-neutron sensitivity of a hydrogenous scintillator (*Letter to the Editor*), A. Smith, P. Guenther and R. Sjoblom 140 (1977) 3
Time dependent deadtime and pile-up corrections for gamma-ray spectroscopy (*Letter to the Editor*), B. A. Roscoe and A. K. Furr 140 (1977) 4
Instrumental line width of a bent crystal spectrometer and measurement of the K_β X-ray width 140 (1977) 5
Signal-to-background ratio for neutron production between 10 and 14 MeV by the reactions $^3H(p,n)^3He$, $^1H(t,n)^3He$, and $^2H(d,n)^3He$, M. Drosg and G. F. Auchampaugh 140 (1977) 5
The 2046 keV $^{27}Al(p,\gamma)^{28}Si$ resonance-capture reaction as a gamma-ray intensity calibration standard, D. L. Kennedy, J. C. P. Heggie, P. J. Davies and H. H. Bolotin 140 (1977) 5
A method to determine the Compton scattering cross sections, Shivaramu, S. Gopal and B. Sanjeevaiah 140 (1977) 5
A simple method for measuring the moments of the gamma particle multiplicity distribution, L. Diósi 140 (1977) 5
Experimental investigation of higher-order Z_1 corrections to the Bethe stopping-power formula, H. H. Andersen, J. F. Bak, H. Knudsen, P. M. Petersen and B. R. Nielsen 140 (1977) 5
Stopping cross section measurements with thin supported films, P. Børgesen and M.-A. Nicolet 140 (1977) 5
Software to drive a GEC Elliot CAMAC interface on a PDP-11 computer running the RSX-11M executive, C. Lengauer and A. Silverman 140 (1977) 5

Nuclear Electronics

An automatic dead time corrector, V. K. Madan 131 (1975) 1
An electronic circuit for plotting spectra from magnetic mass spectrometers on a linear mass scale, W. Nickel, E. Heinicke and F. Glindemann 131 (1975) 1
An automatic digitizer for graphs and polaroid pictures, Y. Paiss, H. Szichman and M. Rosmann 131 (1975) 3
A simple instrument for correction of dead time losses in time measurements, Lars Harms-Ringdahl 131 (1975) 5
A fast inexpensive 1024-bit buffer memory data acquisition system for cosmic ray data using TTL integrated circuits and a paper tape punch, D. J. Fegan 131 (1975) 5
A protective circuit for a 60 kV dc power supply, W. T. Johnstone and T. R. Charlesworth 131 (1975) 5
A programmable NIM-standard prescaler with applications to non-integer frequency division (*Letter to the Editor*), M. Cavalli-Sforza, G. Goggi, R. Nardò and B. Rossini 131 (1975) 5
The use of a new PMOS monolithic integrated circuit for the electronic equipment of a large multiwire proportional chamber (MWPC) detection system (*Letter to the Editor*), Pierre Bareyre, Pierre Borgeaud, Jean Poinsignon and Bernard Billion 131 (1975) 5
Suppression of spurious signals caused by spark chamber radiation (*Letter to the Editor*), Ijazur Rahman and Antony Duane 131 (1975) 5
Analog pulse multiplexer (*Letter to the Editor*), R. Bayer and S. Borsuk 133 (1976) 1
A Camac Branch Driver for Control Data Cyber 70 series and 6000 series computers, P. Bernaudin, M. Bouchel and Truong Thanh Khai 133 (1976) 3
A peak integrator suitable for use with a multichannel pulse height analyser, A. M. Macleod 133 (1976) 5
A digital gain stabilizer for large volume organic scintillation detectors, J. Braunsfurth and K. Geske 133 (1976) 5
Calculation of total and full energy peak efficiencies of Ge(Li) and NaI(Tl) detectors by introducing the mean chord
Minority n out of m coincidence circuits for time-differential experiments with multi-detector arrays, J. Braunsfurth and K. Geske 134 (1976) 3
A high precision pulse-ratio circuit, G. P. Westphal 134 (1976) 3
A multiple interrupt system with priority for a PDP11 computer (*Letter to the Editor*), C. Hojvat and K. Kuchela 134 (1976) 4
Automation of a flat crystal X-ray spectrometer for measuring proton induced X-rays, M. Geretschläger and G. Vogl 134 (1976) 5
A universal CAMAC coincidence circuit, F. Gabriel, V. N. Shuravin and K. Andert 134 (1976) 5
A universal CAMAC pulse shaper, F. Gabriel, V. N. Shuravin and K. Andert 134 (1976) 5
A CAMAC-matrix for distributing fast logic signals, F. Gabriel, V. N. Shuravin and K. Andert 134 (1976) 5
A versatile fast coincidence system with memory, J. Pouthas 135 (1976) 1
Rasterkonvertierungsgerät mit Analogspeicher, E. Schöberl and L. Prager 135 (1976) 3
A zero-level stabilization and baseline restoration device, I. A. Rubinshtein and R. S. Rashkovan 135 (1976) 5
Hardware processing of data from multilayer ionization detectors, I. Lehraus 135 (1976) 5
A compensating nanosecond delay stabiliser, K. D. Grose and J. P. Rippon 136 (1976) 1
A vernier time digitizer for use with large drift chambers, L. Bird and R. G. Findlay 136 (1976) 1
A linear gate for rectifying waveforms applied to its input (*Letter to the Editor*), R. Bayer 136 (1976) 4
An electronic circuit for pulse shape discrimination in organic scintillators, P. Plischke, V. Schröder, W. Scobel, L. Wilde and M. Bormann 136 (1976) 5
The status of CAMAC in 1976, R. C. M. Barnes 137 (1976)
An economical and fast minicomputer for on-line data processing, V. Hungerbühler, B. Mauron and J.-P. Vittet . 137 (1976) 1

A CAMAC controller for a flexible disk drive *(Letter to the Editor)*, F. K. McNeil-Watson **137** (1976) 193
A simple time stretcher with high resolution *(Letter to the Editor)*, W. D. Waddoup and R. J. Stubbs. **137** (1976) 603
A fast integrated discriminator with continuously variable width *(Letter to the Editor)*, A. Borghesi, G. Goggi and R. Nardò **137** (1976) 605
A programmable NIM-standard logic unit *(Letter to the Editor)*, M. Cavalli Sforza, G. Goggi and B. Rossini . **137** (1976) 609
A differential pulse-height discriminator with full channel logic using two integrated circuits, H. A. Cole **138** (1976) 551
Adaptation of a conventional multichannel pulse height analyzer for 4096 × 4096 two-parameter measurement, K. Toyoshima **138** (1976) 557
A compact time digitizer in CAMAC format, D. Freytag **138** (1976) 685
Fast successive approximation analog-to-digital converter *(Letter to the Editor)*, S. G. Gobbur, D. A. Landis and F. S. Goulding. **140** (1977) 405
Programmable combinational logic trigger system for high energy particle physics experiments, E. D. Platner, A. Etkin, K. J. Foley, J. H. Goldman, W. A. Love, T. W. Morris, S. Ozaki, A. C. Saulys, C. D. Wheeler, E. H. Willen, S. J. Lindenbaum, J. R. Bensinger and M. A. Kramer **140** (1977) 549

Nuclear Methods Applied to Other Fields

In-vivo measurement of the neutron dose rate on patients with ^{238}Pu pacemakers implanted, E. Piesch, B. Burgkhardt and W. Kollmeier **131** (1975) 191
Proton-excited X-ray analysis on whole blood using a small accelerator, Ronald T. Boro and Sam J. Cipolla . . **131** (1975) 343
CCA: A high resolution, high sensitivity, three-dimensional imaging system for nuclear medicine, Leroy R. Price . . **131** (1975) 353
Opale, a balloon gamma-ray telescope for the 100 keV–5 MeV energy range, P. Mandrou, M. Niel, J. Narbonne and C. Sabaud **133** (1976) 553
A non-destructive determination of the depth distribution profile of a radionuclide by analysis of its beta-spectrum, S. C. Van de Geijn **133** (1976) 559
Design of a cosmic gamma-ray burst detection system with large-area high-pressure xenon counters, M. Yoshimori and M. Kajiwara **133** (1976) 569
Trace element analysis of freeze-dried blood serum by proton and alpha-induced X-rays, M. Barrette, G. Lamoureux, E. Lebel, R. Lecomte, P. Paradis and S. Monaro **134** (1976) 189
Mössbauer effect measurement in single crystal iron subjected to cyclic stress, J. J. Singh **134** (1976) 363
A cold neutron small angle scattering device for technological applications, C. P. Galotto, P. Pizzi, H. Walther, V. Angelastro, N. Cerullo and G. Cherubini **134** (1976) 369
An alpha particle instrument with alpha, proton, and X-ray modes for planetary chemical analyses, T. E. Economou and A. L. Turkevich **134** (1976) 391
The variations in the background counting rate of a sensitive whole-body radioactivity monitor based on plastic scintillators, K. S. Parthasarathy **134** (1976) 591
Comparison of personnel monitoring systems in the radiation environment of high energy electron accelerators, F. Lucci, M. Pelliccioni, S. Pszona and B. Snopek **135** (1976) 555
In situ measurements of environmental gamma radiation by the use of a Ge(Li)-spectrometer, R. R. Finck, K. Lidén and R. B. R. Persson **135** (1976) 559
Production en routine par cyclotron de fluor-18 et potassium-43 à usage médical au moyen d'une cible gazeuse télécommandée, M. Guillaume **136** (1976) 185
High resolution Chevenkov and range detectors for balloon-borne cosmic-ray experiment, S. P. Ahlen, B. G. Cartwright and G. Tarlé **136** (1976) 229
Adaption of a multichannel analyzer for dynamic X-ray experiments, C. C. Bond and A. R. Faruqi **136** (1976) 383
Moderated REM meters in pulsed neutron fields, H. Dinter and K. Tesch **136** (1976) 389
Influence of the decay products of ^{222}Rn on the background counting rate of a sensitive whole-body radioactivity monitor, K. S. Parthasarathy **136** (1976) 585
A new method for dating pottery by thermoluminescence, S. Charalambous and C. Michael **137** (1976) 565
A method of measuring the neutron absorption cross sections of soil samples for calibration of the neutron moisture meter, D. B. McCulloch and T. Wall **137** (1976) 577
The ^{56}Fe(p,n)^{56}Co reaction in steel wear measurement, A. Niiler and S. E. Caldwell **138** (1976) 179
Tracer analysis of tumor by proton-induced X-ray spectroscopy, K. Ishii, M. Kamiya, K. Sera, S. Morita, T. C. Chu, T. Matsuzawa, F. Shishido and H. Tawara **138** (1976) 185
Limitations of the COS approximation as applied to the cosmic-ray anisotropy, R. D. Zwickl and W. R. Webber **138** (1976) 191
Intrinsic germanium detector used in borehole sonde for uranium exploration, F. E. Senftle, R. M. Moxham, A. B. Tanner, G. R. Boynton, P. W. Philbin and J. A. Baicker **138** (1976) 371
A drift chamber detector for high energy gamma-ray astronomy *(Letter to the Editor)*, K. Bennett, B. G. Taylor, S. P. McKechnie and D. Ramsden **138** (1976) 387
Large-area multi-crystal NaI(Tl) detectors for X-ray and gamma-ray astronomy, G. J. Fishman and R. W. Austin. . **140** (1977) 193
NTA film as a personnel neutron monitor in criticality accidents, M. P. Dhairyawan, G. Venkataraman and U. Madhvanath **140** (1977) 379

TL personnel dosimeter with BeO, G. Busuoli, I. Sermenghi, O. Rimondi and G. Vicini 140 (1977) 38
Etchable ranges of fossil and fresh heavy-ion tracks in lunar and analogous crystals, S. A. Durrani and R. K. Bull . 140 (1977) 55
Use of thin ionization calorimeters for measurements of cosmic ray energy spectra, W. V. Jones, J. F. Ormes and W. K. H. Schmidt 140 (1977) 55
Construction and performance of a large-area multiwire ionization hodoscope for use in a cosmic-ray detector, P. L. Love, J. Tueller, J. W. Epstein, M. H. Israel and J. Klarmann 140 (1977) 56

Letters to the Editor

The 434 keV gamma ray of $^{108}Ag^{m}$ as a new energy standard, Tsuneo Morii and Tadashi Saito 131 (1975) 19
Detector cross registration in recent doubly radiative np capture measurements, H. C. Lee and E. D. Earle . . 131 (1975) 1
Electroplating of osmiun, Ryuichi Arakawa, Tadashi Saito and Kiyoteru Otozai 131 (1975) 36
Investigation of small-volume gaseous discharge ion sources for isotope separation on-line, R. Kirchner and E. Roeckl 131 (1975) 3
An improved method for time-of-flight spectroscopy with an incompletely pulsed cyclotron beam, B. Siebert and R. Jahr 131 (1975) 37
Elimination of charging in the proton-induced X-ray emission analysis of insulating samples, M. Ahlberg, G. Johansson and K. Malmqvist 131 (1975) 37
Simple depth profile determination by proton-induced X-ray emission, M. Ahlberg 131 (1975) 38
A method to detect and identify ^{8}Be, J. Lang, A. Buta, R. Müller and J. Unternährer 131 (1975) 38
Multiple scattering of keV ions: Lateral distributions in argon and nitrogen, G. Sidenius and N. Andersen . . . 131 (1975) 3
Voltage calibration of proton accelerators in the 200 keV–3.5 MeV region, T. R. Ward 131 (1975) 55
Beam stop failure – a potential hazard in tritium gas targets, J. David Carlson 131 (1975) 5
Note on the relation between efficiency and volume of Ge(Li) detectors, E. Somorjai 131 (1975) 55
A proportional counter for efficient Mössbauer scattering experiments, R. A. Levy, P. A. Flynn and R. A. Hartzell 131 (1975) 5
Analyse sous helium par la technique de fluorescence X induite par protons, R. Modjtahed-Zadeh, B. Rastegar, A. Gallmann, G. Guillaume, F. Jundt et P. Sioshansi 131 (1975) 56
Deposition of thin films using an isotope separator, R. P. W. Lawson, J. H. Freeman, J. S. Colligon, W. A. Grant, M. J. Nobes and J. S. Williams 131 (1975) 56
The $O^{16}(\gamma,4p5n)^{7}Be$ reaction as a monitor of intermediate-energy bremsstrahlung doses, J. B. Martins, O. A. P. Tavares, M. L. Terranova and V. Di Napoli 131 (1975) 56
Convergence in multiple neutron scattering correction in plate geometry targets, Raymond A. Zuhr and K. Min . . 131 (1975) 5
A programmable NIM-standard prescaler with applications to non-integer frequency division, M. Cavalli-Sforza, G. Goggi, R. Nardò and B. Rossini 131 (1975) 57
A modular system of multigap proportional chambers, M. Cavalli-Sforza, G. Goggi, G. Iuvino, M. Livan, G. Magnani, B. Rossini and A. Vicini 131 (1975) 57
The use of a new PMOS monolithic integrated circuit for the electronic equipment of a large multiwire proportional chamber (MWPC) detection system, Pierre Bareyre, Pierre Borgeaud, Jean Poinsignon and Bernard Billion 131 (1975) 58
Suppression of spurious signals caused by spark chamber radiation, Ijazur Rahman and Antony Duane 131 (1975) 58
Sub-nanosecond plastic scintillators, P. B. Lyons, C. R. Hurlbut and L. P. Hocker 133 (1976) 17
Relevance of the feature "Cluster Number" in a non-parametric method for the automatic selection of high energy gamma-ray events in spark chambers, R. Buccheri, V. Di Gesù and S. Salemi 133 (1976) 17
Shape deformation of a light flash through a light pipe, F. Calligaris, P. Ciuti, I. Gabrielli and R. Giacomich . . 133 (1976) 18
Analog pulse multiplexer, R. Bayer and S. Borsuk 133 (1976) 18
Variations in the response of an electron multiplier across its active area, S. L. Prunty and C. F. G. Delaney . . 133 (1976) 36
Automatic track counting in gamma-exposed polymer foils with a jumping spark counter, M. Várnagy, E. Gyarmati and T. Sztaricskai 133 (1976) 37
Localisation of the discharge in the multiwire corona counter and the possibility of building a counter with two-dimensional read-out, B. Sitar, R. J. Stubbs and J. M. Breare 133 (1976) 37
Mesure de l'activité effective d'une source α intense, A. M. Pointu, A. K. S. Allaf et M. Fitaire 133 (1976) 37
An iterative method for absorber thickness corrections in Mössbauer experiments, G. Dehe, B. Seidel and W. Meisel 133 (1976) 38
Stepwise statistical method to analyse gamma-ray spectrum, N. S. Singhal, B. M. Saraswat and R. G. Mendiratta 133 (1976) 38
Photoconductivity of irradiated LiF, W. E. Nelson, J. F. Merklin and R. S. Lee 133 (1976) 38
A foil stripper assembly with large foil capacity, J. S. Harrison, C. J. Hill, T. R. Ophel and D. C. Weisser 133 (1976) 57
Radiation damage to ^{3}He proportional counter tubes, A. E. Evans, H. O. Menlove, R. B. Walton and D. B. Smith 133 (1976) 57
A simple Si(p) detector for β- and X-ray spectroscopy, V. V. Avdeichikov, E. A. Ganza and V. P. Prikhodtseva . . 133 (1976) 57
Two useful methods for energy calibration in DSA measurements, H.P. Nottrodt, F. Rauch and P. Hübener 133 (1976) 58
Comments of the few-step discontinuous stopping technique in DSAM, B. M. Latta, B. C. Robertson and P. J. Scanlon 133 (1976) 58
Remarks to the comments on the few-step discontinuous stopping technique, M. Kregar, M. Vakselj and P. Rupnik 133 (1976) 58
A new method to measure electrons in a heavy liquid bubble chamber, F. Jacquet, P. Miné and P. Van Quaethem 134 (1976) 19

me dependence of the induced current in hemispherical semiconductor detectors, C. Canali and H. L. Malm . . 134 (1976) 199
n optical-control system for high-voltage terminals, J. J. Bicek, P. J. Billquist and J. L. Yntema 134 (1976) 401
roportional counter filled with highly purified liquid xenon, M. Miyajima, K. Masuda, A. Hitachi, T. Doke, T. Takahashi, S. Konno, T. Hamada, S. Kubota, A. Nakamoto and E. Shibamura 134 (1976) 403
multiple interrupt system with priority for a PDP11 computer, Carlos Hojvat and K. Kuchela 134 (1976) 407
mulation de la diffusion incohérente du rayonnement gamma par des électrons II, O. Pingot 134 (1976) 595
ffect of molecular geometry on multiple scattering of heavy energetic particles, G. Sidenius, N. Andersen, P. Sigmund, F. Besenbacher, J. Heinemeier, P. Hvelplund and H. Knudsen 134 (1976) 597
data buffer for multi-parameter low-event rate applications, D. E. Cumpstey and D. G. Vass 134 (1976) 601
-ray energy-dispersive powder diffractometry using synchrotron radiation, B. Buras, J. S. Olsen and L. Gerward 135 (1976) 193
permanently sealed multiwire proportional chamber with two-dimensional readout for X-ray applications in the region 20–60 keV, A. Dwuraźny, M. Waligórski, K. Jeleń and K. W. Ostrowski 135 (1976) 197
reparation of isotopic oxygen targets via the anodic oxidation of tantalum, D. Phillips and J. P. S. Pringle . . 135 (1976) 389
reparation of self-supporting ^{142}Ce and ^{140}Ce targets for cyclotron bombardments, J. D. Sherman 135 (1976) 391
n the insertion of a spatially transverse magnetic field in an electron storage ring, G. Brautti and V. Stagno . . 135 (1976) 393
n absolute recoil-proton photoneutron spectrometer using a Monte Carlo calculated efficiency, J. Devos, R. van de Vyver, E. van Camp, R. Carchon and H. Ferdinande. 135 (1976) 395
alibration of an analyzing magnet using an α-source and heavy-ion beams, E. E. Gross 135 (1976) 401
simple method for studying the linearity and resolution of position-sensitive detectors, R. E. White and H. Naylor 135 (1976) 403
$L_{\alpha,\beta,\gamma}$ X-ray intensities from the alpha decay of ^{238}Pu, D. G. Vasilik and R. W. Martin 135 (1976) 405
Method for rapid evaluation of accelerator pulsed beam time performance, J. D. Carlson 135 (1976) 569
nproved performance of HgI_2 spectrometers in the low energy X-ray region, W. Seibt, M. Slapa and G. C. Huth 135 (1976) 573
ghost peaks in a sector-focusing magnetic β-ray spectrometer, J. Kayser and K.-W. Hoffmann 135 (1976) 577
The measurement of reaction thresholds using an escape suppressed Ge(Li) spectrometer, J. F. Sharpey-Schafer, A. M. Al-Naser, A. H. Behbehani, L. L. Green, A. N. James, C. J. Lister and P. J. Nolan 135 (1976) 583
A stable light pulser for gain stabilizing photomultiplier tubes, C. L. Morris, W. J. Braithwaite and C. Fred Moore 136 (1976) 197
Multiple scattering of MeV gold and carbon ions in carbon and gold targets, H. Knudsen and H. H. Andersen . 136 (1976) 199
The acceleration of deuterons by the University of Manitoba variable energy cyclotron, I. Gusdal, G. Knote, A. McIlwain, J. S. C. McKee, S. Oh and H. W. Uzat 136 (1976) 393
The preparation of silicon films suitable for studies of electron-induced fission, A. M. Sandorfi, L. R. Kilius and J. L. Gallant 136 (1976) 395
Kapazitive Sonde für Phasenmessungen an einem gepulsten Ionenstrahl, R. Reimann 136 (1976) 397
A proposal for a combined scintillation-image-intensifier section for application in gamma-camera, B. Shafrir and A. Seidman 136 (1976) 399
Pivoting light guides, T. Bressani, E. Chiavassa, G. Dellacasa, M. Gallio, A. Musso and M. Panighini . . . 136 (1976) 401
A precision energy measurement of the ^{125}I gamma line, J. P. Miller, F. Boehm and H. E. Henrikson 136 (1976) 403
A linear gate for rectifying waveforms applied to its input, R. Bayer 136 (1976) 405
A CAMAC controller for a flexible disk drive, F. K. McNeil-Watson. 137 (1976) 193
Säulenwiderstände für einen EN-Tandem, W. Kreische 137 (1976) 199
Fitting function for the thermal neutron distribution in water due to Ra-Be source, M. Fujishiro, T. Tabata and J. Furuta 137 (1976) 201
Increased cyclotron beam intensity using a harmonic beam interceptor, M. L. Mallory, E. D. Hudson and J. W. Hale 137 (1976) 379
Uranium films for targets, J. Buch, N. I. Balalikin, A. V. Skripnik and V. V. Katrasev 137 (1976) 381
Methode zur rückwirkungsfreien Messung eines Ionenstrahls, R. Reimann 137 (1976) 385
A high-resolution hodoscope using a spherical mirror, A. Gonidec, A. Kupferschmid and K. Kuroda 137 (1976) 387
A simple efficient method of delay-line termination and timing-signals extraction in position-sensitive proportional counters, M. Birk, A. Breskin and N. Trautner 137 (1976) 393
A digital technique for neutron-gamma pulse shape discrimination, C. L. Morris, J. E. Bolger, G. W. Hoffmann, C. F. Moore, L. E. Smith and H. A. Thiessen 137 (1976) 397
Walk-free fast timing for a heavy-ion time-of-flight telescope, N. E. Sanderson, B. R. Fulton and J. B. A. England. 137 (1976) 399
Organization of pulse-height analysis programs for high event rates, C. E. Cohn 137 (1976) 403
Validity of analytical expressions for orbit parameters in AVF cyclotrons with large field modulation, W. Schulte and H. L. Hagedoorn 137 (1976) 583
Phase-free ac acceleration as second-order effect, H. Daniel 137 (1976) 587
Hydrogen streamer chamber with localizing admixtures, I. V. Falomkin, V. I. Lyashenko, Nguyen Min Kao, G. B. Pontecorvo, Yu. A. Shcherbakov, T. M. Troshev, N. I. Trosheva, L. Busso and G. Piragino. 137 (1976) 589
A new thermoluminescent detector for 14.7 MeV neutrons, F. Spurný, M. Králík, R. Médioni and G. Portal . . . 137 (1976) 593
Higher harmonics influence in neutron Fourier TOF spectroscopy, P. Ziegler, G. Badurek and G. P. Westphal . . 137 (1976) 595
Precision energy measurement of the ^{106}Ru 512 keV gamma ray compared with the positron annihilation radiation, K. Shizuma, H. Inoue and Y. Yoshizawa 137 (1976) 599
A simple time stretcher with high resolution, W. D. Waddoup and R. J. Stubbs 137 (1976) 603
A fast integrated discriminator with continuously variable width, A. Borghesi, G. Goggi and R. Nardò. 137 (1976) 605

A programmable NIM-standard logic unit, M. Cavalli Sforza, G. Goggi and B. Rossini **137** (1976) 6
Ionization of a polarized deuterium beam in a Penning discharge, A. Kruger, H.-G. Mathews, S. Penselin and A. Weinig **138** (1976) 2
Semiconductor Si(npn) detector with two surface-barrier junctions, V. V. Avdeichikov **138** (1976) 3
Multiple coulomb scattering of heavy ions in emulsions, Y. V. Rao, K. Fukui and P. S. Young **138** (1976) 3
A drift chamber detector for high energy gamma-ray astronomy, K. Bennett, B. G. Taylor, S. P. McKechnie and D. Ramsden **138** (1976) 3
An apparatus for electrochemical etching of recoil particle tracks in plastic foils, J. H. Thorngate, D. J. Christian and C. P. Littleton **138** (1976) 5
Conversion electron Mössbauer spectroscopy at low temperatures, J. A. Sawicki, B. D. Sawicka and J. Stanek . . **138** (1976) 5
The Poisson equation with the right-hand side $f(z)/\{1+[b(z)\cdot r]^2\}^{\frac{5}{2}}$, A. Sköllermo **138** (1976) 7
Dual parameter list mode for X-ray analysis by crystal spectrometers, R. Hohm, G. Richter and B. Cleff **138** (1976) 7
Production of DT neutrons by means of TiT targets and analyzed atomic deuteron beams, G. Stengl and H. Vonach **140** (1977) 1
A method of protection for the Geiger–Müller counter hodoscope against noise from the wide gap spark chambers, J. Zabierowski **140** (1977) 1
The "flight chamber": A fast, large area, zero-time detector, N. Trautner **140** (1977) 2
Thin target thickness measurement by photon induced X-ray fluorescence, T. Paradellis **140** (1977) 2
The improvement of the spatial resolution of a xenon-filled X-ray imaging MWPC by means of pulse height selection, J. E. Bateman **140** (1977) 2
Stopping power of alpha particles in deuterium gas, W. Del Bianco and J. Richer **140** (1977) 2
Inert gas mixtures for proportional counter, H. Sipilä **140** (1977) 3
A simple low-cost cryogenic controller, I. V. Mitchell and C. P. Bartram **140** (1977) 3
Revised energy responses of ^{6}LiF and ^{7}LiF thermoluminescence dosimeters to neutrons, S. Tanaka and Y. Furuta . **140** (1977) 3
Note on the experimental determination of the relative fast-neutron sensitivity of a hydrogenous scintillator, A. Smith, P. Guenther and R. Sjoblom **140** (1977) 3
Time dependent deadtime and pile-up corrections for gamma ray spectroscopy, B. A. Roscoe and A. K. Furr **140** (1977) 4
Fast successive approximation analog-to-digital converter, S. G. Gobbur, D. A. Landis and F. S. Goulding **140** (1977) 4
A single-channel counting rate monitor, R. R. Gingerich, C. W. Schulte and J. L. Campbell **140** (1977) 5
The digitization of streamer chamber tracks using a standard 625 line T.V. Camera, D. J. Martin, A. M. MacLeod, K. M. Smith and M. D. Rousseau **140** (1977) 5

Elsevier's Dictionary of Measurement and Control

compiled and arranged on an English alphabetical basis by W. E. CLASON, *Geldrop, The Netherlands.*

7795 entries in English/American, French, Spanish, Italian, Dutch, German

To date, there has been no comprehensive multilingual dictionary to cover the large fields of measurement and control. The purpose of this dictionary is to fill the existing gap.

In compiling a multilingual dictionary on measurement and control - two areas closely related to each other - the compiler must take into account automatic and non-automatic control, whereby control as such and the difference between the various modes of control play a role; while, in measurement, the variables to be measured, the measuring apparatus and the measuring methods must be considered. Drawing on the extensive literature of the fields, the author has dealt with all of these aspects of measurement and control.

As with all of the Elsevier Multilingual Dictionaries, the system of numerically keyed alphabetical indexes is used in this dictionary. This successful and popular method allows the user to begin with any one of the languages, and then quickly and easily find its equivalents in all of the other languages.

This dictionary will be of particular interest to engineers and to firms involved in measurement and control.

PHYSICS REPORT

a special discount offer - for private use only!

From the publisher:

Over the past few years, the journal PHYSICS REPORTS (Physics Letters C) has developed into one of the leading review journals for various branches of physics. To date, some 120 review articles have been published.

In the past, the journal was regarded primarily as a ''library journal'' by virtue of the fact that the publisher was obliged to charge a relatively high price for a single issue, owing to the individual postage, handling and invoicing charges involved.

In order to enable the research worker or graduate student to buy his own copy of a particular REPORT, the following scheme has beer devised: North-Holland Publishing Co. is prepared make single issues of PHY REPORTS available to individuals only at the pric US $4.00, US $5.00 or US $6.00 (depending on th number of pages), providi combined orders of at leas US $50.00 are placed wit and a cheque for the corre amount is enclosed with th order.

In effect, this means that y and your colleagues may combine your separate ord as long as the collective o amounts to US $50.00 or

NUCLEAR PHYSICS:

- Semiclassical theory of heavy ion reactions (R.A. Broglia and A. Winther, Copenhagen). Vol. 4, No. 4. US $4.00
- Fission and fusion dynamics (W.J. Swiatecki, Aarhus and Berkeley, S. Bjornholm, Copenhagen). Vol. 4, No. 6. US $4.00
- From soft to real pions in nuclear physics (M. Ericson, CERN and Lyon, M. Rho, Saclay). Vol. 5, No. 2. US $5.00
- Parity-violating nuclear interactions and models of the weak Hamiltonian (E. Fischbach, Lafayette, Ind., D. Tadić, Zagreb). Vol. 6, No. 2. US $5.00
- Parity nonconservation in nuclei (M. Gari, Pasadena, California). Vol. 6, No. 5. US $5.00
- On the shell model and its application to the deformation energy of heavy nuclei (H.C. Pauli, Basel). Vol. 7, No. 2. US $5.00
- Nuclear rotation at high angular velocities (A. Johnson, Copenhagen, Z. Szymański, Warsaw). Vol. 7, No. 4. US $4.00
- Spectroscopic study of multinucleon transfer reactions induced by heavy ions (M.-C. Lemaire, Gif-sur-Yvette). Vol. 7, No. 6. US $5.00
- Bremsstrahlung in nucleon-nucleon collisions (E.M. Nyman, Abo, Finland). Vol. 9, No. 3. US $4.00
- Particle spectra and particle-vibration in the Pb region (I. Hamamoto, Nordita, Copenhagen). Vol. 10, No. 2. US $4.00
- Semiquantal approximations to heavy ion reactions (R.A. Broglia, S. Landowne, R.A. Malfliet, V. Rostokin and Aa. Winther, Copenhagen). Vol. 11, No. 1. US $4.00
- Nuclear structure of light nuclei using the selectivity of high energy transfer reactions with heavy ions (P.S. Fischer et al., Oxford). Vol. 12, No. 3. US $5.00
- Hadronic aspects of photon-nucleus interactions (W. Weise, Stony Brook, N.Y.). Vol. 13, No. 2. US $4.00
- Current status of the relativistic two-nucleon one boson exchange potential (K. Erkelenz, Bonn). Vol. 13, No. 5. US $5.00
- Compact reformulation of distorted-wave and coupled-channel Born approximations for transfer reactions between nuclei (T. Tamura, Austin, Texas). Vol. 14, No. 2. US $4.00
- New giant resonances in nuclei (G.R. Satchler, Oak Ridge, Tenn.). Vol. 14, No. 3. US $4.00
- Classical dynamical theory of heavy ion fusion and scattering (J.P. Bondorf, M.I. Sobel and D. Sperber, Copenhagen). Vol. 15, No. 2. US $4.00
- Generator-coordinate methods in nuclear physics (C.W. Wong, Los Angeles, Calif.). Vol. 15, No. 5. US $5.00
- Microscopic description of isoscalar and isovector giant quadruple resonances (D.R. Bes, R.A. Broglia, B.S. Nilsson). Vol. 16, No. 1. US $5.00
- Reaction mechanism of two-nucleon transfer between heavy ions (U. Götz, M. Ichimura, R.A. Broglia, A. Winther). Vol. 16, No. 3. US $5.00
- A study of nuclear response function (G.F. Bertsch, S.F. Tsai). Vol. 18, No. 2. US $4.00
- Brueckner theory of nuclei (H.S. Köhler). Vol. 18, No. 4. US $4.00
- The self-consistent single-particle model in nuclear physics (H.J. Mang). Vol. 18, No. 6. US $4.00
- Elastic transfer processes in heavy ion scattering (W. von Oertzen, H.G. Bohlen). Vol. 19, No. 1. US $5.00
- Analyticity in hadron-nuclei binary reactions (O.V. Dumbrajs, S. Dubnicka). Vol. 19, No. 3. US $4.00
- The optical potential and nuclear structure (B. Sinha). Vol. 20, No. 1. US $5.00
- Pions interaction with nuclei (J. Hüfner). Vol. 21, No. 1. US $6.00

1978. Volumes 13-16 (in 12 issues)
Subscription Price: US $356.50/Dfl. 820.00 including postage

Scope:

COMPUTER METHODS IN APPLIED MECHANICS AND ENGINEERING publishes papers concerned with applications of digital or hybrid computers to problems of applied mechanics and engineering. Papers are of advanced character, containing substantial contributions to these fields and detailing methods as well as results. Refinements of established techniques are published in the form of notes. Papers dealing with techniques of wide applicability, beyond the boundaries of the field in which they were established, are especially emphasized.

Some recently published papers:

Volume 13 (1978) No. 1 and 2.

Cooling tower supporting columns and reinforcing rings in small and large displacement analyses *(A. S. L. Chan and J. P. Wolf).* Evolution of nonlinear dissipative systems with application to a macro-economic organism *(Koichiro Matsuno).* A general finite element model for shells of arbitrary geometry *(Ö. K. Kiciman and E. P. Popov).* Solution of elastic crack problems by superposition of finite elements and singular fields *(P. Bartholomew).* The hydrocode convergence problem - part 1 *(D. L. Hicks).* A numerically expedient scheme for elastic-plastic calculations in incremental finite element analysis *(E. Paul Sorensen).* A particle model of the Stefan problem *(Donald Greenspan).* Method of magnetic circuits for nonlinear magnetostatic fields in polyphase induction motors at no-load *(Yoshifuru Saito).* An integral solution to a nonlinear diffusion problem *(M. Y. Hussaini and K. J. Devasia).* Variational principles for the transonic airfoil problem *(Graham F. Carey).* Finite element methods for elliptic problems with singularities *(R. Wait).* Optimal plastic design: superposition principles and bounds on the minimum cost *(G. I. N. Rozvany and R. D. Hill).* Coefficient matrices for implicit finite difference solution of the inviscid fluid conservation law equations *(Joseph L. Steger).* The dynamic contact stresses caused by the impact of a nonlinear half-space by an axisymmetrical projectile *(Jacob Aboudi).* Transverse shear stiffness of laminated anisotropic shells *(Gerald A. Cohen).* An explicit-implicit water-level model for tidal computations of rivers *(Udo Meissner).* Application of linear programming to the optimal plastic design of circular plates subject to technological constraints *(D. Lamblin, C. Cinquini and G. Guerlement).* Isochoric constant strain finite elements *(J. H. Argyris, P. C. Dunne and M. Müller).*

Nuclear Molecular Phenomena

Proceedings of the International Conference on Resonances in Heavy Ion Reactions (Hvar, Adriatic Coast, Yugoslavia, May 30 - June 3, 1977)

edited by **NIKOLA CINDRO,** *Laboratory for Nuclear Spectroscopy, "Rudjer Bošković" Institute, Zagreb, Yugoslavia.*

1978 xviii + 432 pages Price: US $52.25/Dfl. 120.00 ISBN 0-444-85116-X

The title of this proceedings volume- "Nuclear Molecular Phenomena"- was chosen specifically to reflect the emphasis of the majority of the papers presented at the conference. Some 70 physicists from 17 countries attended the meeting.

The subject of resonances in heavy ion reactions has only quite recently emerged as a vital field in heavy ion physics. In 1974-75, when it was first suggested that a conference be held on such resonances, there was lively interest in the subject. It can now be seen that these years in fact marked the beginning of a great boom in the publication of experimental papers on resonances, following the relative "lethargy" of the late sixties.

The papers presented in this volume describe both experimental and theoretical developments in the study of resonances in heavy ion reactions, and reflect the feeling of optimism among physicists, who believe that these developments may open the door to a new form of spectroscopy. This new form of spectroscopy would be able to provide an analysis of cluster configurations in the structure of atomic nuclei.

Both theoretical and experimental physicists wishing to have access to an up-to-date overview of developments in this area of their discipline will find these proceedings of particular value.

CONTENTS: Foreword. **INVITED PAPERS:** The Carbon-Carbon Nuclear System *(D. A. Bromley).* Experimental Survey of the Resonant-Like Structures Observed in the $^{16}O + {}^{12}C$ System *(J. Gastebois).* Surface Transparency and Resonance Phenomena and the Heavy Ion Optical Model *(R. H. Siemssen).* Molecules in Heavy Ion Collisions *(R. Könnecke, W. Greiner and W. Scheid).* The Theory of Fragmentation in Fission, Fusion and Heavy Ion Scattering *(H. L. Lustig, K. H. Ziegenhain, J. Hahn, W. Greiner and W. Schneid).* The Two-Body Molecular Model for Resonances in Heavy Ion Reactions *(Y. Abe).* Treatment of Resonances in the Coupled Channel Approximation *(T. Matsuse).* Experiments on Non-resonating Light Systems *(D. Fick).* Interference Effects in Heavy Ion Elastic Scattering *(H. Doubre and C. Marty).* Total Reaction Cross Sections for Heavy Ions *(R. H. Davis).* Resonant and Non-Resonant Behaviour of Complete Fusion Cross-Sections in Light Heavy Ion Collisions *(S. Harar).*

Problems with Computer Programs?

WHY WASTE TIME AND MONEY DESIGNING AND TESTING YOUR OWN COMPUTER PROGRAM WHEN THE ONE YOU NEED MAY ALREADY BE AVAILABLE?

WE OFFER **2 POSSIBILITIES OF SOLVING YOUR PROBLEMS** IN COMPUTATIONAL PHYSICS AND COMPUTER PROGRAMS IN PHYSICS:

1. Computer Physics Communications

COMPUTER PHYSICS COMMUNICATIONS: the leading international journal publishing descriptions of computer programs in physics. It also publishes papers and letters on computational methods and the application of computers to physics, in the following areas: descriptions of numerical methods; descriptions of computer techniques; general descriptions of programs in a particular field of physics or quantum chemistry; general descriptions of methods or programs associated with the design, running or analysis of experiments; descriptions of program languages and system programs which are of particular importance to physicists or quantum chemists; comments on previous publications in CPC; review papers in the general field of computational physics; and comments on manufacturers' hardware and software.

2. The Program Library

Affiliated to Computer Physics Communications is the CPC Program Library. This Library is a non-profitmaking organisation which holds and distributes all the programs published in Computer Physics Communications. The library offers a dual service: a subscription scheme designed for laboratories and institutes who wish to receive regularly all the contributed programs, and a service to scientists who require particular programs relevant to their research. Full details are available from the program librarian: V.M. Burke, School of Physics and Applied Mathematics, The Queen's University of Belfast, Belfast BT7 INN, Northern Ireland.

Please write for full details on the journal. We will gladly mail you a free copy of the journal and the cumulative program index of Computer Physics Communications.
